PREFACE

This mission training plan (MTP) is designed for the Infantry rifle company. This MTP provides Active and Reserve Component commanders and staff with a descriptive, mission-oriented training program to train the infantry battalion to perform its critical wartime missions. Although a unit's missions and deployment assignments impact on the commander's final set of training priorities, the tasks described herein are the primary ones the unit must be able to execute with proficiency. The unit is expected to train all tasks to standard. Standards for training may be made more difficult but may not be lowered.

The proponent for this publication is HQ, TRADOC. The preparing agency is the US Army Infantry School. Submit recommendations for improving this publication on DA Form 2028 (Recommended changes to Publications and Blank Forms) or in any clearly written format and forward them to Commandant, US Army Infantry School, ATTN: ATSH-ATD, Fort Benning, GA 31905-5007. CHAPTER 1 Unit Training

1-1. General. This Mission Training Plan (MTP) is designed to provide the unit leader with a tactical training and evaluation program for the unit. It also provides guidance about how to train and the key missions on which to train. The specific details of the training program depend on many factors, including:

- Unit's mission essential tasks list (METL).
- Training directives and guidance established by the chain of command.
- Training priorities for the unit.
- Training resources and areas available.

1-2. Supporting Material. The unit-training program fits into the spectrum of activities that also encompasses battalion-level, company-level, leader, and individual training programs. Each MTP contains the following:

- Training information.
- Training matrixes.
- Mission outlines (company and below). Training plans (battalion level and higher).
- Sample training exercise examples.
- Comprehensive detailed Training and Evaluation Outlines (T&EOs).
- Evaluation information.
- Appendixes describing Combined Arms Training Strategy (CATS) (for battalion level and higher), sample operations order with threat statement, and other proponent specific information as appropriate.

1-3. MTP Echelon Relationship. (See Figure 1-1.)

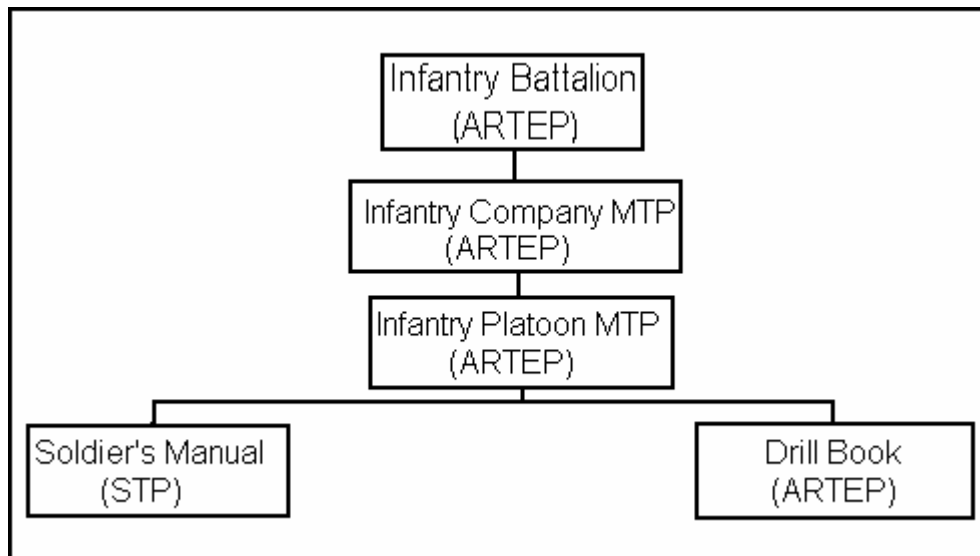

Figure 1-1. MTP echelon relationship.

1-4. Contents. This MTP consists of the following:

- a. *Chapter 1*, Unit Training, provides the explanation and organization of this MTP.
- b. *Chapter 2*, Training Matrixes, presents the relationship between missions and tasks.

- c. *Chapter 3, Mission Outlines*, presents a graphic portrayal of the relationship between critical wartime missions and subtasks inherent to those operations.
- d. *Chapter 4, Training Exercises*, provides information on developing training exercises. It also provides sample situational training exercises (STXs) to be used by leaders to develop training exercises for their unit.
- e. *Chapter 5, Training and Evaluation Outlines*, provides the training criteria for tasks that the unit must master to perform critical wartime operations. These training criteria orient on the levels of collective training executed by the unit. Each T&EO can be applicable to one or more operations.
- f. *Chapter 6, External Evaluation*
- g. *Appendix A, Description of Combined Arms Training Strategy*.
- h. *Appendix B, Exercise OPORDs*.
- i. *Appendix C, Enemy Analysis*.
- j. *Appendix D, Digital Supplement*.

1-5. Missions And Tasks. Full spectrum operations include offensive operations, defensive operations, stability operations, and support operations. Each operation includes major tasks that the unit must execute to accomplish that mission. Each of these tasks requires training.

- a. **Collective Tasks**. Collective tasks are trained based on guidelines and procedures outlined in FM 7-0 (25-100) and FM 7-10 (25-101) and in Chapters 4, 5, and 6 of the applicable MTP. Collective tasks may be trained separately or, like collective tasks and or supporting tasks, may be grouped together. Collective tasks can also be combined with those of other operational levels to form more complex training exercises. (See to Chapter 4 for examples of STXs.) Leaders select the applicable tasks using procedures outlined in FM 7-0 (25-100) and in Chapters 3 and 6 of this MTP.
- b. **Leader Tasks**. Leader tasks are trained using soldier's manuals (SMs). Selected leader tasks should support the unit's critical wartime operations. Leaders can be trained using the full range of training exercises established by the Army. (This might include, for example; map exercises [MAPEXs], tactical exercises without troops [TEWTs], and so forth).

1-6. Principles of Training. This MTP is based on the training principles outlined in FM 7-0 (25-100). The following paragraphs summarize these concepts:

- a. **Train as a combined arms and service team**. Army doctrine places a premium on teamwork. When committed to battle, each unit must be prepared to execute combined arms and services operations without additional training or lengthy adjustment periods. Combined arms proficiency develops when teams train together. Leaders must regularly practice cross-attachments with the full wartime spectrum of combat, combat support (CS), and combat service support (CSS) units.
- b. **Train as you fight**. Conversely, units fight as they have been trained. Soldiers remember the last way they performed a task (right or wrong). To ensure success in combat, soldiers and units must perform to established standards that in turn must be rigidly enforced by leaders. Because the type of weather and terrain a unit will face when executing a combat mission is unpredictable, training should be conducted under varying conditions that are both realistic and progressively more challenging.
- c. **Use Appropriate Doctrine**. Soldiers have no time to learn nonstandard procedures. Their units, therefore, must train by performing tasks to the standards specified in MTPs, drills, SMs, regulations, and other training and doctrinal publications. This MTP conforms with doctrine published in source documents, which are FM 3-21.10 (7-10), and ARTEP 3-21.20 (7-20)-MTP.

- d. Use performance-oriented training. Soldiers sharpen their skills by performing hands-on training as often as possible. That makes practice the key factor in training. Platoons and squads repeatedly practice the tasks and the missions to achieve proficiency.
- e. Train to challenge. The best training is tough, realistic, and both intellectually and physically challenging. It motivates soldiers and inspires excellence by fostering initiative, enthusiasm, and eagerness to learn.
- f. Train to sustain proficiency. Soldiers sustain the skills they learn only by practicing them. When developing a training plan, always allow time to practice the tasks and the missions covered in earlier training. Use this MTP as a guide in developing a plan that allows the unit to achieve and sustain collective and individual proficiency.
- g. Train using multi-echelon techniques. This is the most efficient way to train and sustain a diverse range of mission-essential tasks while compensating for limited training resources and time. Training should involve soldiers, leaders, and subordinate elements at all levels of the unit simultaneously.
- h. Train to maintain. Maintenance is a vital part of every training program. Keeping equipment ready for the fight is as important as training soldiers to be proficient in its use. Soldiers and leaders are responsible for maintaining all assigned equipment in a high state of readiness in preparation for training or combat employment.
- i. Make commanders the primary trainers. Commanders are responsible for the training and performance of their soldiers and units. They are the primary training managers and trainers for their organizations.

1-7. Training Strategy. The training program developed and executed by the unit to train to standards in its critical wartime missions is a component of the Army's Combined Arms Training Strategy (CATS). (See Appendix A for a description of CATS.) The following should be considered when developing a unit training strategy.

- a. Descriptive strategies. The unit training strategies central to CATS provide the leader with descriptive lists for training. These strategies reflect an optimal way to train to standard. However, some units in the Army probably do not have the same resources required to execute an optimal training strategy.
- b. Role of the unit. The unit training strategy consists of three elements. When integrated with the training tasks found in the MTP, they form a comprehensive and focused training strategy that allows the unit to train to standard. The elements of the unit's training strategy are *maneuver*, *gunnery*, and *soldiers*.
 - (1) *Maneuver strategy*. The maneuver strategy includes a set of recommended training frequencies for key training events in a unit and depicts those resources that are required to support the training events.
 - (2) *Gunnery Strategy*. The gunnery strategy is based on weapons systems in the unit. The strategy includes an annual training plan and lists resources required to support weapons training. Data for the gunnery strategy come from the STRAC manual or the appropriate field manual. As a subset of the gunnery strategy, a training strategy is developed for each individual and crew-served weapon in the Army inventory.
 - (3) *Soldier strategy*. The soldier strategy provides an annual plan for training and maintaining skills at the individual level. It also lists the resources required to train the soldier.

c. **Training gates.** A vital element in the unit training strategy is the identification of critical training gates. Critical training gates are defined as training events that must be conducted to standard before the unit advances to a more complex or resource-intensive training event or task. Training events follow the crawl, walk, run training method. For instance, if the unit training strategy calls for conducting an FTX, and an STX has been identified as a critical training gate for the FTX, the training tasks in the STX must be trained to standard before conducting the FTX. Standards for all tasks must be clearly defined so that the trainer can assess the preparedness of the soldiers or units. The provision for critical training gates recognizes that the unit's METL and the commander's assessment of his unit's training status will determine the selection and timing of the collective training exercises in a specific unit's training strategy.

d. **Standard Army Training System.** The SATS provides automated tools for implementing the training management doctrine in FM 7-0 25-100, and related manuals.

SATS aids in the development of METL, training strategies, training plans, and training schedules. It also gives commanders a medium through which to coordinate activities, project resources needed for an event, record the actual resources expended on an event, assess the execution of a collective task and METL, and assess operational readiness. CATS data can be consulted at different points in SATS to assist you in developing your training products.

Training Note: The SATS database comprises a variety of MTPs and STPs. To access these publications, users need a copy of the SATS software and the CD-ROM containing the data files. For information on the database and hardware requirements or to order the software and CD-ROM, contact the U.S. Army Training Support Center, ATTN: ATISD, Fort Eustis, Virginia 23605-5166 or call DSN 927-4166 or commercial (804) 878-4166.

1-8. **Conducting Training.** Effective training requires the personal time, energy, and guidance of commanders. Commanders must personally observe and assess training at all echelons. Their specific emphasis is on training one level down and evaluating two levels down; for example, battalion-level commanders train company commanders with their companies and evaluate platoon leaders with their platoons. Company commanders train platoon leaders with their platoons and evaluate section, squad, team, and crew leaders with their units.

This MTP helps leaders plan, prepare, and execute unit training in a logical and efficient manner. The following discussion summarizes procedures and considerations for each step in the methodology:

a. **Plan the training.** Planning is a centralized process that links the unit METL and the execution of battle-focused training. It aligns training priorities with wartime requirements at all levels within the unit. Although other training requirements exist, battle focus allows the leader to narrow his planning scope to wartime mission essential tasks. As in tactical operations, planning lays the foundation for successful execution of the unit's training plan. The following discussion covers several aspects of the planning process.

(1) Planning for the unit training program involves company, platoon, and squad leaders.

(a) The company commander is the primary trainer of all the platoons within the company. He is responsible for developing a comprehensive, long-term training strategy encompassing a variety of training events, such as FTXs and STXs. Based on the unit's METL, the commander initially assesses the entire company to identify systemic weaknesses. He then develops a training focus and specifies the individual and collective tasks he wants to train and evaluate.

(b) The platoon leader focuses on leader and collective training. Platoons should perform all collective tasks according to standard IAW MTP, FM 3-21.8 (7-8) and unit TSOPs. To do so, platoons can plan and execute limited STXs before taking part in company training. These exercises can increase the confidence level of platoons and squads and provide valuable operational experience. In addition, the platoon leader can use operation order (OPORD)

drills to ensure his subordinate leaders have a basic understanding of the tasks they must execute.

(2) In developing the unit-training plan, leaders at all levels should adhere to the principles outlined in FM 7-0 (25-100) and FM 7-10 (25-101). The following will help leaders with development:

(a) Chapter 3 includes examples of mission outlines that can help leaders develop individualized training programs that reflect their current METL. Leaders can adjust these plans to tailor the exercises to their needs.

(b) Chapter 4 includes outlines for sample exercises.

(c) Chapter 5 contains T&EOs for collective tasks that support critical wartime operations.

(d) Chapter 6 provides guidance for planning and conducting evaluations of unit training exercises.

(3) Time never allows the leader to train all tasks. Leaders must prioritize the tasks that require training. They focus on their units' largest operational challenges and most difficult sustainment skills. Before training begins, the unit leader should meet with the subordinate leaders to analyze training requirements and prioritize tasks. This can also help identify weak areas.

(4) Once unit leaders identify the tasks to train, they integrate those tasks into a training schedule. They can use the following procedures:

(a) List the tasks by priority and training frequency.

(b) Determine the time required.

(c) Decide how to use multi-echelon training.

(d) Determine where to train.

(e) Determine who will do what. The leader of the element being trained must always be involved.

(f) Organize the unit's needs into blocks of time and required training resources, such as ammunition, Multiple-integrated Laser Engagement System (MILES) equipment, and suitable training areas.

(5) The unit leader may submit a list of the tasks and related training events he selects to the higher headquarters commander. The higher headquarters commander in turn develops his own list, after reviewing lists submitted by subordinate leaders. Once the higher headquarters commander has approved the list of tasks and related training events, he includes them on the unit-training schedule. He must be sure to allocate sufficient preparation time to subordinate leaders.

(6) Along with his recommendations for training events, the platoon leader also submits the list of resources he will need, providing the higher headquarters with sufficient time for acquisition and coordination.

b. Train and certify leaders. This is the most important step in training and applies to all trainers, evaluators, and leaders involved in unit training.

(1) The proficiency and preparedness of the evaluation team directly affect the quality of training and the level of proficiency that units gain at the training site. Before executing training, unit leaders certify all trainers and subordinate leaders to ensure their technical and tactical proficiency to train and evaluate the unit. To do so, they use a series of leader professional-development sessions followed by certification exercises, TEWTs, or examinations. The examinations can take the form of written tests, sand table evaluations, or both.

Training Note: Trainers should have held the position of the individuals they are selected to evaluate.

(2) The leaders within the unit must train before the unit takes part in a collective training exercise. Higher headquarters commanders ensure that the subordinate leader is able to perform the required leader tasks in support of the team's collective tasks. Consequently, the subordinate unit leader is responsible for training his subordinate leaders on the individual tasks required to support the collective tasks.

c. Reconnoiter the site. After trainers and evaluators are certified, the unit leader and the evaluation team must make a site reconnaissance of the area where the exercise will occur. At this point, they can begin to develop graphic control measures for the exercise. The unit leader and evaluation team also conduct a terrain analysis to identify all key terrain and the following locations:

- STX lanes.
- OPFOR positions.
- Assembly areas.
- Leader training sites.
- After-action review sites.
- Logistical support locations.
- Command post locations.
- Retraining areas.

d. Complete the plan. Completion of the plan includes several actions that transform the commander's intent and concept and the unit concept into a fully developed unit OPORD. These actions include preparing overlays, refining the indirect fire list, completing combat service support (CSS) and C2 requirements, as well as updating the tentative plan as a result of the reconnaissance or SA updates. It also allows the unit leader to prepare the briefing site, briefing medium, and briefing material he will need to present the OPORD to his subordinates. Completing the plan allows the unit leader to make final coordination with other units or the commander before issuing the OPORD to his subordinates.

e. Issue the order. The OPORD precisely and concisely explains the unit leader's intent and concept of how he wants the squads to accomplish the mission. The OPORD must not contain unnecessary information that could obscure what is essential and important. The unit leader must ensure his subordinate elements know exactly what must be done, when it must be done, and how the unit must work together to accomplish the mission and stay consistent with the intentions of the commander.

f. Rehearse. The value of this step should never be underestimated. Rehearsals are a critical part of every training exercise. Units must never bypass rehearsals to save time or resources. The company commander plans for unit rehearsals and ensure they are conducted as parts of troop-leading procedures. A well-planned, efficiently run rehearsal can accomplish the following:

- (1) It will reinforce earlier training and increase proficiency in the critical tasks to be evaluated.
- (2) It will reveal weaknesses or problems in the plan.
- (3) It will synchronize the actions of the unit.

(4) It will confirm coordination between the unit and adjacent units.

(5) It will improve each leader's understanding of:

- l The concept of the operation
- l The fire plan
- l Anticipated contingencies
- l Possible actions and reactions for situations that may arise during the operation

g. Execute. The unit should initiate a training exercise only when it clearly understands how to execute the mission. The trainer determines this at the conclusion of the rehearsals. At that point, he either allows the unit to execute the task or continues with additional rehearsals, focusing on leader training. During the execution phase, the trainer conducts a detailed evaluation for use during the AAR, which is conducted immediately following the exercise. Evaluations are conducted based on the GO or NO-GO criteria described in Chapter 5 of this MTP. The Trainer rates the participants on each task trained during the exercise.

h. Conduct the AAR. At the conclusion of the exercise, the unit receives a complete AAR from the trainer. The AAR, which focuses on the training objectives and standards, is a professional discussion that requires the active participation of those being trained. This structured review process allows training participants to discover for themselves what happened, why it happened, and how the unit can improve its performance. Based on the unit's performance, the trainer recommends to the next higher commander whether the team will require retraining to meet the standards.

i. Conduct retraining. Based on the evaluation results, the unit must undergo retraining on each task for which it receives a NO-GO rating. Trainers and leaders develop a training program to meet these specific requirements. The team can then be reevaluated, either immediately at the exercise site or at a later date.

Training Note: Battle focus derives peacetime training requirements from wartime missions. It guides the planning, execution, and assessment of the unit's training programs to ensure the unit trains as it fights. Battle focus is critical throughout the entire training process. Unit leaders use it to allocate resources for training based on wartime operational requirements. A unit cannot attain proficiency to standard on every task because of time or resource constraints. However, a successful training program is achievable by narrowing the training focus to a reduced number of vital tasks that are essential to mission accomplishment.

1-9. Force Protection (Safety). Risk assessment is the thought process of making operations safe without compromising the mission. Unit leaders must continuously perform a risk assessment of conditions under which training is conducted to prevent the unnecessary loss of soldiers and equipment. The degree of risk varies with the conditions at the time of training. For example, have the soldiers done the training before? Will the training be done for the first time at night? Are the soldiers fatigued? In reality, risk management is smart decision-making.

- a. A well-trained unit is normally accident free; however, accidents can occur through no fault of the soldier or equipment operator. Most accidents result from inadequately trained, unsupervised, or complacent personnel.
- b. Training must be tough, realistic, and safe. Unit leaders must consider the following points as they integrate risk assessment into their training:
 - Accept no unnecessary risks.
 - Make risk decisions at the proper level.
 - Accept risks if mission benefits outweigh the costs.

- c. The commander is the safety officer, but all soldiers and leaders are responsible for safe training. All leaders must—
 - Identify the risks using the factors of mission, enemy, terrain, troops, time, and civil considerations (METT-TC).
 - Assess possible loss, cost, and probability.
 - Make decisions and develop controls to reduce risks.
 - Implement controls by integrating them into plans, orders, standing operating procedures (SOPs), training performance standards, and rehearsals.
 - Supervise and enforce safety controls and standards at all times. (Leaders should make on-the-spot corrections when an unsafe act is observed.)
- d. Leaders use the safety checklist of the United States Army Safety Center, Fort Rucker, Alabama, in conjunction with local unit safety checklists, to enhance the overall safety practices of soldiers during training.

1-10. Environmental Protection. Environmental planning includes identifying environmental risks posed by an operation and considering ways to reduce those risks during long-, short-, and near-term planning. All leaders, trainers, and soldiers must comply with the environmental laws and regulations. The leader must identify the environmental risks associated with training individual and collective tasks. Trainers must work to reduce and avoid damage to training areas and environment caused by realistic training. Environmental risk management parallels safety risk management and is based on the same philosophy as safety risk management. Environmental risk management consists of the following steps:

- a. Identify hazards. Identify the potential sources for environmental degradation during the analysis of the factors of METT-TC. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and or destroying cultural and or historical artifacts.
- b. Assess hazards. Analyze the potential severity of environmental degradation by using the environmental risk assessment matrixes in TC 5-400. The severity of environmental degradation is considered when determining the potential effect an operation may have on the environment. The risk effect value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment resulting from the operation as extremely high, medium, or low, using the environmental assessment matrixes.
- c. Make environmental risk decisions. Make decisions and develop measures to reduce high-environmental risks.
- d. Brief chain of command. Brief the chain of command (to include installation environmental office, if applicable) about proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.
- e. Implement controls. Implement environmental protection measures by integrating them into plans, orders, SOPs, training performance standards, and rehearsals.
- f. Supervise. Supervise/enforce environmental protection standards.

Note: The battalion staff may produce an environmental protection-level matrix similar to the example in Figure 1-2. This matrix ties directly into risk assessment.

3. Natural Resources				
a. Water	Unit SOP	Unit SOP	Erosion control	No degradation of water due to erosion or effluent
b. Vegetation	Unit SOP	Restriction on camouflage	Clearing in excess of 100 acres requires joint task force (JTF) approval	Clearing requires environmental assessment
c. Air	Unit SOP	Dust suppression nonhazardous only	Control open fires, fugitive dust	Controls on incineration and traffic
d. Wildlife	Unit SOP	Unit SOP	Note and avoid specific habitats	Taking species prohibited
4. Cultural and Historical Resources				
	Unit SOP	Minimize damage if possible	Division-level approval required for operations in area	JTF approval required for operations in area

Figure 1-2. Notional Environmental Protection Matrix.

1-11. Evaluation. Evaluations can be internal or external. Internal evaluations are conducted at all levels, and they must be inherent in all training. External evaluations are formal and are usually conducted by the headquarters two levels above the unit. Chapter 6 describes how to set up an external evaluation.

- a. Use of T&EOs. In addition to their role as a training guide, the T&EOs in Chapter 5 provide the criteria for evaluating the unit. The task standard statement in each task outline describes how well the unit must perform the task steps and performance measures to receive a GO rating for the task.
- b. Simultaneous training and evaluation. The heart of the MTP concept is simultaneous training and evaluation. Every training exercise provides evaluation feedback; at the same time, every evaluation is a training session. For the program to work effectively, trainers must always evaluate training as it is being executed. A common deficiency is the failure to evaluate each task each time it is performed. Leaders should emphasize direct, on-the-spot evaluations. Correcting poor performance during individual or small group training is easy. Outside evaluators usually make this unfeasible for higher-level exercises. Leaders should plan AARs at frequent and logical intervals during exercises. This technique allows the unit leader to correct performance shortcomings while they are still fresh in everyone's mind.
- c. Nuclear, biological, and chemical (NBC) evaluations. Training plans should include evaluations of each task and exercise under NBC conditions. Consider conducting at least one iteration of each training event in mission-oriented protective posture (MOPP) gear.

CHAPTER 2 Training Matrixes

2-1. General. The training Matrix assists the commander in planning the training of his unit's personnel.

2-2. Mission to Collective Tasks Matrix. This matrix (Figure 2-2), identifies the missions and their supporting collective tasks. The tasks are listed under the appropriate BOS which are indicated by an **X** in the matrix. The BOS used in this matrix are defined in TRADOC Pam 11-9. A specific mission is trained by identifying collective tasks in the vertical column for the mission. Based on the proficiency of the unit, training is focused on operational weaknesses.

The mission identification table listed below (Figure 2-1) provides mission identification for the unit.

CHAPTER 3

Mission Outlines

3-1. General. Mission outlines are graphic portrayals of the relationship between critical wartime missions (METL tasks) and the supporting tasks inherent in those missions. Each outline provides the trainer a diagram of the unit mission, example exercises, and the collective tasks that comprise them.

Note: The following mission outlines are provided as **examples only**. The trainer should develop mission outlines for his unit based on the unit's wartime missions.

a. Example mission outlines will be shown for the following missions:

- Offense
- Defense
- Reconnaissance and security
- Retrograde
- Stability

3-2. Relationship of Mission Outlines to Training Matrixes. The matrixes in Chapter 2 of this MTP provide the critical collective tasks for company missions. These tasks can be combined to form STXs. Different combinations of these tasks can be put into many different STXs and training plans to provide well-rounded training for the unit.

3-3. Mission Outline Preparation.

- a. Prepare mission outlines for all company wartime missions using the same general format. List each supporting task in a general flow pattern through the planning, preparation, and execution of a mission. The task list and relationships can then be used to construct training exercises to support training for those missions.
- b. Follow the steps of Table 3-1 to construct mission outlines.

Step	Action
1	Select a critical mission for which to construct an outline.
2	Review the mission outline format.
3	Determine the heading of the mission outline. <ul style="list-style-type: none"> ▪ Verify the unit name. ▪ Verify the critical mission. ▪ Verify the title and number of supported exercise (if any).
4	Write the heading. <p><u>For example:</u></p> <p style="text-align: center;"> INFANTRY COMPANY MISSION OUTLINE <u>ATTACK</u> FTX <u>Deliberate Attack</u> 7-2-E0001 </p>
5	Line the STXs as column headings. <p><u>For example:</u></p> <p style="text-align: center;"> STX <u>Occupy Assembly Area</u> 7-3-E0001 </p>
6	List for each STX the collective tasks and drills inherent in each.
7	Verify that the tasks listed in each mission outline agrees with the T&EO sequence listed in each STX that has been developed. (See chapter 4 for a discussion on developing an STX.)

Table 3-1. Mission outline development steps.

3-4. Mission Outline Examples. The example mission outlines that follow indicate the relationship between a battalion level FTX and the supporting company STXs. They also indicate the relationship between the company STXs and their supporting T&EOs and drills.

CHAPTER 4 Training Exercise

While developing training events, the leader should review the Combined Arms Training Strategy (CATS) for his unit along with this chapter. CATS provides additional detailed information on audience and on time and support requirements.

4-1. **General.** This chapter provides guidance to leaders and or trainers on planning, preparing, executing, and evaluating training exercises. The training exercises and graphics presented in this chapter are for **instructional purposes only**. Each leader and or trainer should develop training exercises to train their unit.

The information in this chapter supplements field manual (FM) 7-10.2 (25-4), FM 7-10 (25-101), and training circular (TC) 25 series.

- Lock cargo hatches.
 - Avoid grabbing the hot barrel of a machine gun.
 - Know their own and their buddies' locations during live-fire exercises.
 - Confirm, double-check and reconfirm all mortar firing data.
- a. Training exercises are used to train and practice the performance of collective tasks. This Mission Training Plan (MTP) describes how to develop two types of exercises: Field Training Exercise (FTX) and Situational Training Exercise (STX). An example FTX and STX exercise is included to assist the company commander and or platoon leader in developing training exercises for the platoon.
- (1) Training exercises are numbered in accordance with TRADOC Pam 350-70-1. (Table 4-1 is an example of how to number training exercises.)

Exercise Number	Title
FTX 07-1-E0001	Conduct Combat Operations
STX 07-2-E0003	Conduct a Reconnaissance
STX 07-2-E0008	Conduct Security Operations in a Stability Environment

Table 4-1. Exercises.

4-2. **FTX.** An FTX is a high-cost, high-overhead exercise conducted under simulated combat conditions in the field. The FTX supports training at battalion, company, and platoon levels. FTXs fully integrate the total force in a realistic combat environment. An FTX involves combat arms, CS, and CSS units and encompass such training as battle drills, crew drills, and STXs to reinforce soldier and collective training integration. They are used to train the leaders, subordinate elements, and slice elements--

- I To move and maneuver units realistically.
- I To employ organic weapons systems effectively.
- I To build teamwork and cohesion.
- I To plan and coordinate supporting fires.
- I To plan and coordinate logistical activities to support tactical operations.

4-3. STX. STXs are short, scenario-driven, mission-oriented tactical exercises that train a single collective task (T&EO) or a group of related battle drills and collective tasks (T&EOs). STXs provide the leader with a method to train using doctrinally approved tactics and techniques. Unlike a battle drill, an STX does not establish the method of execution. STXs may be modified based on the factors of METT-TC. STXs provide for standardization without stereotyping training. Although mission-oriented (based on higher headquarters OPORD), an STX does not train all tasks required for an operation. STXs require leader tasks (such as planning, controlling, and reporting) that tie the supporting collective tasks together. Each STX focuses on a specific mission (IAW higher headquarters OPORD), but does not stand alone (under all conditions) as the only STX required for operation proficiency. To accomplish proficiency, several STXs within the same operation can be trained. This is a continuous process that must be repeated for each operation.

4-4. Planning Exercises. (See FM 7-10.2 [25-4], How to Conduct Training Exercises.)

a. Conduct analysis.

(1) Determine the need for training exercises and identify the types to be used. The need for an exercise is based upon the following:

- (a) Higher headquarters' analysis of subordinate unit proficiency.
- (b) Higher headquarters' issuance of the missions, goals, objectives, and guidance.
- (c) Commanders' evaluations of unit and soldier proficiency.
- (d) METL. (Company is the lowest level to prepare a METL.)

(2) Consider the principles of training established in FM 7-10 (25-101).

(3) Establish the training requirements and the priorities for unit training programs.

(4) Determine the training objectives, which are based on the leader, individual, and collective (unit) skills/tasks that need initial or sustainment training.

(a) Exercise objectives should be specific, relevant, realistically obtainable, measurable, and supportive of exercise goals.

(b) Exercise objectives should be organized into functional areas to highlight activities that need improvement.

(c) Properly stated objectives provide evaluators with a solid basis for conducting their evaluation and after-action reviews (AARs).

Note: When the exercise objectives are established, the type of exercise to be conducted can be selected.

b. Select the type of exercise.

(1) Determine the type of exercises to be conducted by comparing the objectives with the kind of training that each exercise provides.

(2) Identify the proper exercise, within resource constraints, that can best meet the objectives.

c. Considerations.

(1) Flexibility.

(a) Plan for alternate types of exercises in case weather or other constraints prohibit the originally scheduled exercise.

(b) Exercises should allow subordinate commanders the freedom to innovate within the framework of doctrine, tactics, techniques, and operating procedures.

(c) Exercises should not follow rigid timetables that inhibit training and learning. Instead, they should establish schedules that provide sufficient time to correct mistakes and ensure learning and AARs at all levels.

(2) Resources.

(a) Facilities and land.

1) Planners must consider the environment for the exercise and the impact of weather. If inadequate land or facilities will seriously degrade training, planners may have to alter the exercises.

(b) Support.

1) Planners must ensure that the exercises can be conducted within the resource levels and that the training received justifies the resources expended.

2) Communications and transportation for participants and evaluators must be adequate.

3) Units should use only the transportation, communications, and equipment authorized by their table of organization and equipment (TOE) or modified table of organization and equipment (MTOE).

(c) Time.

1) For each exercise, subordinate elements must be allocated time to conduct troop-leading procedures as well as develop tactical situations that lead to logical and sound tactical employment of player units.

2) Time must be allocated for conducting complete logistical support of tactical operations.

3) Time must be allocated so that a thorough AAR can be conducted.

(d) Participants.

1) Planners must consider whether or not units or groups of individuals to be trained are of the proper size or strength to benefit from the type of exercise selected.

(e) Pre-exercise plans.

1) Planning begins immediately after the decision has been made to conduct an exercise. The planning steps listed below are used to prepare for an exercise. Specific exercises may omit some steps. These steps are generally sequential; however, some may be performed simultaneously.

a) Preparing an exercise directive that--

- l Specifies what type of exercise is to be conducted and state its specific training objectives.
 - l Indicates the time frame for the exercise, its physical location, and the duration of its execution phase. The location, time, and duration must be consistent with the type of exercise selected and the training objectives.
 - l Identifies the type and quantity of special equipment required.
 - l Provides additional information such as environmental constraints.
- b) Assigning responsibilities for planning.
 - c) Conducting research.
 - d) Preparing a supporting plan schedule.
 - e) Preparing an outline plan.
 - f) Conducting a reconnaissance.
 - g) Completing the exercise support plans.
 - h) Preparing the scenario.
 - i) Preparing and issuing the operation plan (OPLAN) or OPORD.
 - j) Publishing the memorandum of instruction (MOI).
 - k) Preparing the terrain.
 - l) Conducting a rehearsal.

d. Develop the exercise.

Note: Formats for the FTX and STX are addressed in this chapter.

(1) Exercise format. Formats for FTXs and STXs are generally the same.

Note: The following table lists the components of the FTX format and their purposes in the order they would appear.

Heading	Identify the proponent, type, title of exercise, and number.
Objective	Describe "who" and "what" the exercise is designed to train.
Interface	Provide a list of the next higher echelon FTX(s) and the supporting elements or units STX(s).
Training Enhancers	Provide specific information for using the FTX for training and provide a sample scenario for training.
General Situation	Provide general information concerning the unit and its training environment.
Special Situation	Provide specific information from higher headquarters or the unit's commander.
Support Requirements	Provide a listing of those items required to conduct the exercise. If it is a battalion or higher echelon MTP, the support requirements would be a statement that says the support requirements are the consolidated requirements of the battalion headquarters and all its subordinate units.
T&EO Sequence	Provide a listing of T&EO task titles and page numbers in the chronological sequence in which they are executed in the course of the exercise.

Table 4-2. FTX format.

Note: The following table lists the components of the STX format and their purposes in the order they would appear.

Heading	Identify the proponent, type, title of exercise, and number.
Objective	Describe "who" and "what" the exercise is designed to train.
Interface	Provide a list of titles and identify the applicable supporting STX (company for battalion MTP and platoon for company MTP) and supporting subordinate unit's drills (platoon for company MTP and squad for platoon MTP). Include habitually attached, supported, and supporting unit's STXs, if available, which may be trained in conjunction with this STX.
Training Enhancers	Provide leader training information and training tips. Provide specific information for using the STX for training and provide a sample scenario for training.
General Situation	Provide general information concerning the unit and its training environment.
Special Situation	Provide sample fragmentary order (FRAGO) from unit commander. Provide specific information required for the exercise from higher headquarters not given in the FRAGO
Support Requirements	Provide a listing of those items required to conduct the exercise.
T&EO Sequence	Provide a listing of T&EO task titles and page numbers in the chronological sequence in which they are executed in the course of the exercise.

Table 4-3. STX format.

(2) Example exercises follow.

INFANTRY COMPANY FTX**7-2-E0001****Conduct Combat Operations**

1. **Objective.** Within the context of this MTP the primary objective of this FTX is to train and or evaluate the infantry company in the conduct of combat operations. This FTX trains and or evaluates the company commander and subordinate leaders in planning, preparing, executing, and assessing combat operations. This FTX is designed as a free-play, force-on-force exercise that provides a flexible training vehicle for training critical METL tasks.

Note: The specific sequence of events will vary with the actions of the opposing force (OPFOR) and battalion commander's training objectives. The company commander will modify the sequence of events through his selection of primary and supporting events to meet his specific training objectives.

2. **Interface.**

a. This FTX supports the higher headquarters FTX 07-1-E0001, Conduct Combat Operations

b. This FTX is supported by:

- (1) STX 07-2-E0001, Conduct an Attack
- (2) STX 07-2-E0002, Conduct a Defense.
- (3) STX 07-2-E0003, Conduct a Reconnaissance.
- (4) STX 07-2-E0007, Conduct a Movement to Contact.
- (5) STX 07-2-E0008, Conduct Security Operations in a Stability Environment.
- (6) STX 07-3-E0017, Conduct Overwatch and or Support by Fire.

3. **Training Enhancers.** In preparing the company to conduct an FTX, the commander and subordinate leaders must first assess soldier, leader, and unit proficiency in accomplishing the METL. This will provide the basis to identify areas on which to concentrate future training. Since this is a high-cost exercise, extensive planning and preparation are required to ensure the exercise training objectives are met. OPFOR controllers and OPFOR should be the same used in both the practice exercises and for the actual FTX. The commander and subordinate leaders can develop and conduct the initial or needed training to attain proficiency in designated areas before the FTX.

a. **General Tips for Training.**

- (1) Conduct AARs, throughout the exercise, that focus on strengths, weaknesses, and safety.
- (2) Include normal attachments and DS elements (field artillery, engineers).
- (3) Ensure the OPFOR is trained in enemy tactics and doctrine.
- (4) Include OPFOR personnel in AARs.
- (5) Use trained personnel to act as enemy prisoners of war (EPW).
- (6) Integrate nuclear, biological, and chemical (NBC) and electronic warfare (EW).

- (7) Ensure that personnel are familiar with the tactical standing operating procedures (TSOP) that relate to the exercise.
- (8) Review soldier familiarity with the training environment.
- b. Pre-exercise activities as follows:
 - (1) MAPEX(s) combined with sand table exercise(s) that match the terrain to be used during the FTX.
 - (2) TEWT and or terrain walk.
 - (3) Communications exercise.
 - (4) Applicable STX (company or platoon).
- c. Exercise instructions.
 - (1) Perform this exercise at full speed after performing building-block training (individual training and drills) to reach the "run" level of execution.
 - (2) The tasks that support this FTX must be executed to standard.
 - (3) The size of the OPFOR element facing the unit must be supportable and doctrinally correct.
 - (4) MILES should be used when feasible.
 - (5) Ensure that the conditions set for the exercise are realistic.
 - (6) Except for MILES or appropriate simulation devices, use only TOE equipment or authorized replacements.
 - (7) Use controllers and or evaluators that are thoroughly knowledgeable in the specific tasks to be evaluated.
 - (8) This exercise begins with the receipt of a WARNO and it ends after consolidation and reorganization.
 - (9) This exercise should be conducted under all environmental conditions and during periods of daylight and limited visibility. The battalion should operate under threat of NBC attacks, attacks by ground or air, indirect fire, and EW.
- d. Scenario. Your BN (1-5 IN) is conducting combat operations in the country of Wadiland as part of the 1st Brigade. The country of Wadiland has a well trained combat force that consists of air, sea, and ground forces. The enemy possesses biological and chemical weapons and may have nuclear capability. Hostilities have been on going for six months. For the most part, the civilian population is in favor of military actions by the US and its allies.
- e. Table 4-4 is an example of a listing of sequence, events, and associated time.

Sequence	Event	Estimated Time
1	Administrative Preparations	Pre FTX
2	Receive Warning Order	1 hr.

3	Plan Operations Using the MDMP	4 hr.
4	Prepare OPLAN	1 hr.
5	Develop Road Movement Order	40 min.
6	Develop Occupation, Internal Support, and Defense Plans	1hr 15 min.
7	Intermediate AAR	1 hr.
8	Conduct Tactical Movement	2 hrs.
9	Conduct a Movement to Contact	6 hrs.
10	Intermediate AAR	1 hr.
11	Conduct an Attack	6 hrs.
12	Conduct Consolidation	30 min.
13	Conduct Reorganization	1 hr.
14	Intermediate AAR	1 hr.
15	Conduct a Defense	24 hrs.
16	Final AAR	3 hrs.
Total Time: <u>53 hrs 25 min</u>		
<p>NOTES:</p> <p>Additional time is required if large portions of the exercise are conducted at night, under limited visibility, or under MOPP conditions.</p> <p>Events will be trained to standards, not time limitations.</p> <p>The time required to train an event will vary based on METT-TC factors and the proficiency of the unit staff.</p>		

Table 4-4. Example sequence, events, and associated time.

4. General Situation.

a. 1st Brigade continues to conduct tactical operations against Wadiland forces. At D+ 17, 1st Brigade began its attack with two heavy task forces (TFs) abreast to destroy security zone forces and penetrate the enemy's first and second defensive belts in zone. TF 3-66 Armor has bypassed a reinforced company in the security zone. The friendly element that was left in contact was destroyed.

5. Special Situation. Your BN (1-5 IN) has received a FRAGO that directs it to conduct a movement to contact to find and on order destroy a bypassed enemy company. The BN is given a "be prepared" mission to defend.

a. The BN issues an OPORD. (See Appendix B.)

6. Support Requirements. The support requirements for the FTX are the consolidated requirements for the battalion headquarters and all its subordinate elements. Support requirements include the following:

a. 100% of TOE equipment readiness code (ERC) A items.

b. Minimum trainers or evaluators. When conducting a company-level internal training exercise, the commander, executive officer (XO), platoon leaders, and squad leaders are the trainers/evaluators, but they may need additional assets from the battalion to support the FTX.

Each evaluator should be supported by an evaluation plan to guide his actions during the exercise and support the battalion commander's overall evaluation plan. Evaluators must position themselves to monitor all unit activities as well as the actions and communications.

- c. Vehicles and communications support for evaluators and OPFOR.
 - d. Designated medical evacuation vehicles with communications and medical personnel support.
 - e. Classes of supply I through V, VIII, and IX in sufficient quantities to support the FTX (friendly, evaluator, and OPFOR).
 - f. Opposing force. Company-size forces should oppose maneuver battalions. Platoon-sized forces should oppose maneuver companies. A reinforced squad can support special events such as ambushes. The OPFOR should be equipped with vehicles that realistically simulate enemy mobility capabilities. Ideally, the OPFOR will be equipped with modification kits that suggest the appearance and silhouette of enemy combat equipment.
 - g. Maneuver area. A training area large enough to support battalion maneuver is required.
7. T&EOs. T&EOs used in evaluating the training exercise are listed in the sequence they will occur during the exercise. Table 4-5 is a sample list of T&EOs.

INFANTRY COMPANY STX

Conduct an Attack

7-2-E0001

1. Objective. Within the context of this MTP, the primary objective of this STX is to train and or evaluate the company in the conduct of an attack. It trains and or evaluates the unit's ability to plan, prepare, execute, and assess offensive operations.
2. Interface.
 - a. This STX supports the higher headquarters FTX 07-1-E0001, Conduct Combat Operations.
 - b. This STX is supported by:
 - (1) STX 07-3-E0001, Conduct a Deliberate Attack.
 - (2) STX 07-3-E0003, Conduct a Reconnaissance.
 - (2) STX 07-2-E0013, Employ Fire Support.
 - (3) STX 07-2-E0017, Conduct Overwatch and or Support by Fire.
3. Training.
 - a. General Tips for Training.
 - (1) Conduct AARs, throughout the exercise, that focus on strengths, weaknesses, and safety.
 - (2) Include normal attachments and DS elements (field artillery, engineers).
 - (3) Ensure the OPFOR is trained in enemy tactics and doctrine.
 - (4) Include OPFOR personnel in AARs.
 - (5) Use trained personnel to act as enemy prisoners of war (EPW).
 - (6) Integrate nuclear, biological, and chemical (NBC) and electronic warfare (EW).
 - (7) Ensure that company personnel are familiar with the company's tactical standing operating procedures (TSOP) that relate to the exercise.
 - (8) Review soldier familiarity with the training environment.
 - b. Pre-exercise activities as follows:
 - (1) MAPEX(s) combined with sand table exercise(s) that match the terrain to be used during the STX.
 - c. Exercise instructions.
 - (1) Perform this exercise at full speed after performing building-block training (individual training and drills) to reach the "run" level of execution.

- (2) The tasks that support this STX must be executed to standard.
- (3) The size of the OPFOR element facing the unit must be supportable and doctrinally correct.
- (4) MILES should be used when feasible.
- (5) Ensure that the conditions set for the exercise are realistic.
- (6) Except for MILES or appropriate simulation devices, use only TOE equipment or authorized replacements.
- (7) Use controllers and or evaluators that are thoroughly knowledgeable in the specific tasks to be evaluated.
- (8) This exercise begins with the receipt of a FRAGO and it ends after consolidation and reorganization.
- (9) This exercise should be conducted under all environmental conditions and during periods of daylight and limited visibility. The company should operate under threat of NBC attacks, attacks by ground or air, indirect fire, and EW.

d. Scenario. Your company is conducting operations as part of the 1-5 IN BN in the country of Ursula. The country of Ursula has a well trained combat force that consists of air, sea, and ground forces. The enemy possesses biological and chemical weapons and may have nuclear capability. Hostilities have been on going for six months. For the most part, the civilian population is in favor of military actions by the US and its allies.

4. General Situation.

a. 1-5 IN BN has located the bypassed enemy company and has been ordered to attack. The BN commander has designated your company (A/1-5 IN) as the BN assault element. Coordinates for the objective area and the start time are provided in the FRAGO. Enemy use of NBC weapons is likely.

5. Special Situation.

a. The BN is occupying an assembly area and is preparing for the attack. Your company receives a BN FRAGO, Figure 4-1 & 4-1a.

FRAGMENTARY ORDER. 01

Map Series. No change to OPORD.

Time Zone Used Throughout the Order: Local

1. SITUATION.

Enemy forces. 1-5 IN BN is opposed by an enemy reconnaissance company that is estimated to be at 70% strength.

Friendly forces. No change to OPORD.

2. MISSION. 1-5 IN BN attacks to destroy an enemy reconnaissance company at Objective (name) (grid) and Objective (name) (grid) NLT (date/time group) to prevent the enemy company from interdicting 1st Brigade LOCs.

3. EXECUTION.

Intent. We must rapidly defeat the enemy reconnaissance company in order for the BDE to maintain the momentum of its attack while allowing the BDE freedom of movement in the Northern portion of the BDE zone. We will conduct the mission using one company as a breach force, one company as the assault force, and one company (-) as the support force. One infantry platoon in will remain in reserve. Our end-state should be the defeat of the enemy company with the BN postured to continue the support of the BDE main effort in the North. I will accept risk in that B/1-5 IN will be able to infiltrate undetected and will be in its support position prior to BN attack.

a. Concept of operation.

(1) Maneuver. 1-5 IN conducts a deliberate night attack NLT _____ to secure OBJs (name) and (name) in order to defeat an enemy reconnaissance company. The BN will lead with B/1-5 as the breaching force to secure OBJ (name). A/1-5 (+) as the assault force will conduct the main attack along Axis (name) to secure OBJ (name). AA 1-5 (+) as the support force will infiltrate along Axis (name) to BP (name) NLT _____ and will support the BN attack. Recon/1-5 IN NLT _____ screens the right flank of the BN.

(2) Fires. No indirect fires prior to (date, time) without BN approval. Priority of fires is initially to B/1-5 IN shift to A/1-5 IN, on order.

(3) Counter-air operations. No change to OPORD.

(4) Intelligence. No change to OPORD.

(5) Electronic warfare. Priority is initially to B/1-5 IN then shifts to A/1-5 IN.

(6) Engineer. Priority is to B/1-5 IN then to A/1-5 IN.

b. Tasks to maneuver units.

Figure 4-1. Sample FRAGO.

FRAGMENTARY ORDER. 01 (continued)

- (1) A/1-5 IN.
 - (a) Coordinate with B/1-5 IN for location and passage of breaching lanes along PL (name).
 - (b) Receive 1/C/1-5 for duration of mission.
- (2) B/1-5 IN.
 - (a) Move to and secure OBJ (name) NLT _____, clear at least two lanes in enemy barrier zone for A/1-5 IN assault.
 - (b) Coordinate with A/1-5 IN for location and passage of the breaching lanes.
 - (c) Be prepared to assume the main attack.
 - (d) Receive 1/C/1-5 for duration of mission.
- (3) C/1-5 IN.
 - (a) Release 1/C/1-5 to B/1-5 for duration of mission.
 - (b) Release 3/C/1-5 to AA/1-5 for duration of mission.
 - (c) Release 2/C/1-5 as BN reserve.
- (4) AA/1-5 IN (+).
 - (a) Receive 3/C/1-5 for duration of mission.
 - (b) Infiltrate and occupy BP (name) NLT _____.
 - (c) Support by fire B/1-5 IN breach operations and then A/1-5 IN attack.
- (5) Mortar/1-5 IN. Priority of fires is initially to B/1-5 IN, then to A/1-5 IN.
- (6) Recon/1-5 IN. Screen the left flank of the BN from LD/LC to PL (name) NLT _____. On order, from PL (name) to PL (name) then from PL (name) to PL (name), the LOA.

4. SERVICE SUPPORT. No change to OPORD.

5. COMMAND AND SIGNAL.

- a. Command. BN main CP located VIC _____, on order moves to _____.
- b. Signal. SOI index Alpha in effect.

INFANTRY COMPANY STX

Conduct a Defense

7-2-E0002

1. Objective. Within the context of this MTP, the primary objective of this STX is to train and or evaluate the company in the conduct of a defense. It trains and or evaluates the unit's ability to plan, prepare, execute, and assess defensive operations.
2. Interface.
 - a. This STX supports the higher headquarters FTX 07-1-E0001, Conduct Combat Operations.
 - b. This STX is supported by:
 - (1) STX 07-3-E0002, Conduct a Defense
 - (2) STX 07-2-E0003, Conduct a Reconnaissance.
 - (3) STX 07-2-E0013, Employ Fire Support.
 - (4) STX 07-2-E0017, Conduct Overwatch and or Support by Fire.
3. Training.
 - a. General Tips for Training.
 - (1) Conduct AARs, throughout the exercise, that focus on strengths, weaknesses, and safety.
 - (2) Include normal attachments and DS elements (field artillery, engineers).
 - (3) Ensure the OPFOR is trained in enemy tactics and doctrine.
 - (4) Include OPFOR personnel in AARs.
 - (5) Use trained personnel to act as enemy prisoners of war (EPW).
 - (6) Integrate nuclear, biological, and chemical (NBC) and electronic warfare (EW).
 - (7) Ensure that company personnel are familiar with the company's tactical standing operating procedures (TSOP) that relate to the exercise.
 - (8) Review soldier familiarity with the training environment.
 - b. Pre-exercise activities as follows:
 - (1) MAPEX(s) combined with sand table exercise(s) that match the terrain to be used during the STX.
 - c. Exercise instructions.
 - (1) Perform this exercise at full speed after performing building-block training (individual training and drills) to reach the "run" level of execution.

- (2) The tasks that support this STX must be executed to standard.
- (3) The size of the OPFOR element facing the unit must be supportable and doctrinally correct.
- (4) MILES should be used when feasible.
- (5) Ensure that the conditions set for the exercise are realistic.
- (6) Except for MILES or appropriate simulation devices, use only TOE equipment or authorized replacements.
- (7) Use controllers and or evaluators that are thoroughly knowledgeable in the specific tasks to be evaluated.
- (8) This exercise begins with the receipt of a FRAGO and it ends after consolidation and reorganization.
- (9) This exercise should be conducted under all environmental conditions and during periods of daylight and limited visibility. The company should operate under threat of NBC attacks, attacks by ground or air, indirect fire, and EW.

d. Scenario. Your company is conducting operations as part of the 1-5 IN BN in the country of Ursula. The country of Ursula has a well trained combat force that consists of air, sea, and ground forces. The enemy possesses biological and chemical weapons and may have nuclear capability. Hostilities have been on going for six months. For the most part, the civilian population is in favor of military actions by the US and its allies.

4. General Situation.

a. 1st BDE has been successful in penetrating the 2^d defensive belt of the 821 MRR. TF 3-66 AR and TF 1-22 MECH are now occupying BP's (name) and (name) and have transitioned to the defense. This is in anticipation of an enemy counterattack into the BDE sector by elements of the 84 Motorized Rifle Division (MRD). 1-5 IN has successfully defeated the enemy reconnaissance company that was located along PL (name). 1-5 IN is currently consolidating after their attack vic PL (name).

5. Special Situation.

a. 1-5 IN has consolidated after their attack vic PL (name) and is preparing to defend. Your company (A/1-5 IN) receives a BN FRAGO, Figure 4-2, 4-2a, & 4-2b.

FRAGMENTARY ORDER. 02

References. OPORD 03.

Map Series. No change to OPORD.

Time Zone Used Throughout the Order: Local

1. SITUATION.

a. Enemy forces. The 1 BDE has been successful in defeating the 821 MRR. Elements of the 84 MRD, an Army Reserve Force, have been delayed by our 41st DIV's deep battle effort. However, it appears that the 84 MRD will counterattack within 24 hours into the BDE sector. Lead elements of the 84 MRD, the 44 MRB, have been successful in penetrating a seam in the East between TF 3-66 AR and the 54 IN DIV. This unit's most probable course of action is to continue to attack with at least two companies attempting to cut the BDE's LOCs from East to West to support the 84 MRD against 1 BDE sector.

Friendly forces.

(1) 1 BDE Intent: The purpose of this operation is to defeat elements of the 84 MRD in zone. We will accomplish this by conducting an area defense with two TFs defending well forward and an IN BN defending the East portion of the BDE zone. I am assuming risk that the IN BN will be in the proper position to prevent the enemy from cutting through to the rear of our MBA zone and blocking our LOC's. Our end-state will be the defeat of the 44 MRB, the lead battalion of the 84 MRD, opposing our BDE with our two task forces abreast in an area defense oriented to the Northwest along PL (name) and the IN BN defending in sector, on order, becomes the BDE reserve.

(2) TF 1-22 IN on our South (left) defends in sector VIC BP (name) (grid) along PL (name) (grid to grid).

(3) 2 BDE, 54 IN DIV in the North (right) defends in sector VIC PL (name) (grid to grid).

(4) TF 3-66 AR to our front defends in sector VIC BP (name) (grid) along PL (name) (grid to grid).

2. MISSION. 1-5 IN defends in sector from _____ to _____ NLT _____ to defeat elements of 44 MRB. On order, moves to and occupies BP (name) as BDE reserve and prepares to conduct offensive operations.

3. EXECUTION.

Intent: The purpose of this operation is to defeat elements of the 84 MRD located in the Northeast. We will accomplish this by establishing a cohesive defense and shaping a penetration in sector to draw elements of the 44 MRB into a kill zone. I'm assuming risk that the place in which we have established the defense will canalize the enemy preventing him from bypassing our IN BN and cutting our BDE LOCs. Our end-state will be the defeat of 44 MRB in sector with our 3 IN companies and occupation of BP (name) as the BDE reserve.

Figure 4-2. Sample FRAGO.

FRAGMENTARY ORDER. 02 (continued)

(1) Maneuver. 1-5 IN conducts a defense in sector to defeat elements of the 44 MRB. C/1-5 IN in the North occupies BP (name), B/1-5 IN in the center, as the BN main effort, occupies BP (name), and A/1-5 IN in the South occupies BP (name). Recon elements screen the right flank of the BN sector. Maneuver companies establish a security zone VIC PL (name). Through the use of the security forces and MBA locations, companies will shape a penetration in order to force elements of the 44 MRB into EA (name) so that AT and indirect fires can be maximized to assist in the defeat of the enemy force. BN deep fires will focus on delaying 2^d echelon forces forward of PL (name). 1/A/1-5 IN is designated BN reserve.

(2) Fires. Priority of FA fires is to deep battle initially, then to C/1-5 IN, B/1-5 IN, and A/1-5 IN in order. Priority of CAS to deep operations.

(3) Counter-air operations. Air defense priorities are to the BN TOC then to maneuver units.

(4) Intelligence. Initial priority is to identifying the location of the lead elements of the 44 MRB, on order shifts to 2^d echelon elements of 44 MRB.

(5) Electronic warfare. Priority to B/1-5 IN.

(6) Engineer. Priority to C/1-5 IN followed by B/1-5 IN. Priority of effort is countermobility, survivability, and then mobility.

b. Tasks to maneuver units.

(1) A/1-5 IN. Provide 1/A/1-5 IN as BN reserve NLT ____.

(2) B/1-5 IN.

(a) Coordinate with SCT/1-5 IN for fire control and movement through your sector.

(b) Be prepared to receive OPCON BN reserve to reinforce your sector.

(3) C/1-5 IN. Be prepared to receive OPCON BN reserve to reinforce your sector.

(4) Mortar/1-5 IN. Priority of fires is initially to C/1-5 IN then to B/1-5 IN.

(5) Recon/1-5 IN.

(a) NLT ____ screen the right flank of the BN sector from 1 BDE 54 IN DIV boundary to PL (name) initially.

(b) Be prepared to reinforce B/1-5 IN, on order.

(c) Coordinate with B/1-5 IN for movement and fire control measures in their sector.

Figure 4-2a. Sample FRAGO.

FRAGMENTARY ORDER. 02 (continued)

(6) AT/1-5.

(a) NLT ____ occupy BPs (name) and (name) and cover AA (name).

(b) Be prepared to mass fires into EA (name), on order.

c. Task to combat support units.

(1) A/2-8 FA (DS).

(a) Chemical support. Priority of smoke to C/1-5 IN then to B/1-5 IN.

(b) Fire support.

1. General. Priority of fires to deep battle then to C/1-5 IN and B/1-5 IN in order.

2. Organization for combat. No change.

(2) 1/A/65 EN. Priority of effort is survivability, countermobility, and then mobility.

d. Coordinating instructions.

(1) This order is effective for planning immediately and execution on order.

(2) Maneuver units will notify BN upon crossing all phase lines with security forces.

(3) Companies will establish a security force along PL (name) in sector.

(4) Companies will allow no penetration beyond 500 meters of PL (name).

(5) No fires beyond 1 BDE 54 IN DIV boundary without the approval of this headquarters.

4. SERVICE SUPPORT. No change to OPORD.

5. COMMAND AND SIGNAL.

a. Command. BN main CP located VIC_____, on order moves to _____.

b. Signal. SOI index Alpha in effect.

INFANTRY COMPANY STX**7-2-E0008****Conduct Security Operations in a Stability Environment**

1. Objective. Within the context of this MTP, the primary objective of this STX is to train and or evaluate the company in the conduct of security operations in a stability environment. It trains and or evaluates the unit's ability to plan, prepare, execute, and assess security operations.

2. Interface.

tx5236 a. This STX supports the higher headquarters FTX 07-1-E0005, Conduct Stability Operations.

b. This STX is supported by:

- (1) STX 07-3-E0003, Conduct a Reconnaissance.
- (2) STX 07-3-E0010, Process Captured Documents and Equipment.
- (3) STX 07-3-E0015, Establish a Checkpoint.
- (4) STX 07-3-E0016, Conduct a Presence Patrol.
- (5) STX 07-3-E0022, Establish an Observation Post.
- (6) STX 07-3-E0023, React to a Civil Disturbance.
- (7) STX 07-3-E0024, Search a Building.
- (8) STX 07-3-E0025, Secure Civilians During Operations.

3. Training.

a. General Tips for Training.

- (1) Conduct AARs, throughout the exercise, that focus on strengths, weaknesses, and safety.
- (2) Include normal attachments and DS elements (field artillery, engineers).
- (3) Ensure the OPFOR is trained in enemy tactics and doctrine.
- (4) Include OPFOR personnel in AARs.
- (5) Use trained personnel to act as enemy prisoners of war (EPW).
- (6) Integrate nuclear, biological, and chemical (NBC) and electronic warfare (EW).
- (7) Ensure that company personnel are familiar with the company's tactical standing operating procedures (TSOP) that relate to the exercise.
- (8) Review soldier familiarity with the training environment.

b. Pre-exercise activities as follows:

(1) MAPEX(s) combined with sand table exercise(s) that match the terrain to be used during the STX.

c. Exercise instructions.

(1) Perform this exercise at full speed after performing building-block training (individual training and drills) to reach the "run" level of execution.

(2) The tasks that support this STX must be executed to standard.

(3) The size of the OPFOR element facing the unit must be supportable and doctrinally correct.

(4) MILES should be used when feasible.

(5) Ensure that the conditions set for the exercise are realistic.

(6) Except for MILES or appropriate simulation devices, use only TOE equipment or authorized replacements.

(7) Use controllers and or evaluators that are thoroughly knowledgeable in the specific tasks to be evaluated.

(8) This exercise begins with the receipt of a FRAGO and it ends after consolidation and reorganization.

(9) This exercise should be conducted under all environmental conditions and during periods of daylight and limited visibility. The company should operate under threat of NBC attacks, attacks by ground or air, indirect fire, and EW.

d. Sample scenario.

(1) Summary of the enemy situation.

(a) Background. The United States has a treaty agreement with the Checkers Republic that declares the US intent to support any newly elected democratic government with both economic and military aid. In a recent election, the citizens of Checkers turned out the leadership of the Checkers Patriotic Front (CPF) by electing a new Prime Minister and cabinet pledging democratic reform within the country. The election, monitored by international observers, was very close with the winner managing only 53% of the popular vote. As a result, disgruntled supporters of the losing party have taken to the streets in various cities throughout the country. Some elements of the CPF have refused to accept the election results and have threatened violence if a new election is not held within one month. Other factions within the country are politically, ethnically, and religiously allied with neighboring Chess whose totalitarian regime had been strongly influencing the CPF during the past decade. The government of Chess worked in vain to prevent the election of the democratic government now in power—a government it deemed to be more aligned with western democratic nations and far less favorable to Chess interests.

(b) The Checkers Republic and Chess have been belligerents for almost 200 years, actually going to war about 85 years ago. While the two countries have many citizens who share a common religion and ethnic background, the governments of the two emerging nations have chosen different economic and social paths. The current border

between the two countries, set by international agreement and arbitration after the last war in 1915, has continued to be a source of conflict and disagreement for more than 85 years. The Mongrel Republic, the country bordering the Checker Republic on the north, has generally remained neutral during past disagreements between Checker and Chess, but they have made no secret of their desire to possess a critical natural resource available only in northeast Checker.

(c) Belligerent Forces:

- Checkers: Checkers Army; paramilitary forces; and religious, political, and other factions.
- Chess: Chess Army and paramilitary forces.

(d) Composition: The Checker Army is at 70% strength. The Chess Army is at 80% strength. The paramilitary forces from both countries operate without a clearly defined order of battle but can be expected to fight in squad to platoon-sized groups. Paramilitary forces are not well armed and normally operate dismounted but occasionally employ modified civilian vehicles armed with small arms.

(e) Recent Activities: Paramilitary forces from Checkers threatened that a defeat of the CPF in the recent election might trigger wide-scale violence and the use of a biological agent to poison the water supply throughout the country.

(2) Concept. The battalion will conduct any or all of the following tasks, on order (O/O), to establish and maintain stability in the area of operations (AO).

- (a) Conduct intelligence-gathering activities.
- (b) Establish a quick reaction force (QRF) to respond to sites of civil disturbance.
- (c) Man observation posts (OPs).
- (d) Man checkpoints and or roadblocks.
- (e) Conduct patrols.
- (f) Provide escorts for military and or civilian movements as required.
- (g) Secure selected sites (for example, voting sites, refugee camps, schools, churches).
- (h) Enforce curfews.
- (i) Stabilize areas that have escalating tension.
- (j) Open and secure routes as required.
- (k) Conduct weapons site inspections as required.

4. General Situation. The battalion is conducting operations independently or as part of the 1st Brigade. The battalion is occupying a base camp 2 kms west of the Akusk Airport in the Checker Republic. Base camp security has been established. The battalion has been given on order (O/O) missions to conduct security operations in the area of operations (AO) Local populace and factions may or may not be cooperative.

5. Special Situation. Your company (A/1-5 IN) has been designated as the quick reaction force (QRF). The company has rehearsed possible contingency operations required of the QRF. Your company receives an BN FRAGO to react to a civil disturbance. (See Figure 4-3 & 4-4.)

CHAPTER 5

Training and Evaluation Outlines

5-1. Introduction. This chapter contains the training and evaluation outlines for the unit. T&EOs are the foundation of the MTP and the collective training of the units. T&EOs are training objectives (task, conditions, and standards) for the collective tasks which support critical wartime operations. The unit must master designated collective tasks to perform its critical wartime operations. T&EOs may be trained separately, in an STX, in an FTX, or in live-fire exercises. For collective live-fire standards, the trainer needs to refer to the applicable gunnery manual for the appropriate course of fire. Those standards and courses of fire need to be integrated into the training exercise.

5-2. Structure. The T&EOs in this chapter are listed in Table 5-1. The Mission-to-Collective Task Matrix in Chapter 2 lists the T&EOs required to train the critical wartime missions according to their specific BOS.

5-3. Format. The T&EOs are prepared for every collective task that supports critical wartime operation accomplishment. Each T&EO contains the following items:

a. Element. This identifies the unit or unit element(s) that performs the task.

b. Task. This is a description of the action to be performed by the unit, and provides the task number.

c. References. These are in parenthesis following the task number. The reference which contains the most information (primary reference) about the task is listed first and underlined. If there is only one reference do not underline the reference.

d. Iteration. Used to identify how many times the task is performed and evaluated during training. The "M" identifies when the task is performed in MOPP4.

e. Commander/Leader Assessment. This is used by the unit leadership to assess the proficiency of the unit in performing the task to standard. Assessments are subjective in nature and use all available evaluation data and submit leader input to develop an assessment of the organization's overall capability to accomplish the task. Use the following ratings:

(1) T - Trained. The unit is trained and has demonstrated its proficiency in accomplishing the task to wartime standards.

(2) P - Needs practice. The unit needs to practice the task. Performance has demonstrated that the unit does not achieve standard without some difficulty or has failed to perform some task steps to standard.

(3) U - Untrained. The unit can not demonstrate an ability to achieve wartime proficiency.

f. Condition. A statement of the situation or environment in which the unit is to do the collective task.

g. Task standard.

(1) The task standard states the performance criteria that a unit must achieve to successfully execute the task. This overall standard should be the focus of training. It should be understood by every soldier.

(2) The trainer or evaluator determines the unit's training status using performance observation measurements (where applicable) and his judgment. The unit must be evaluated in the context of the

METT-T conditions. These conditions should be as similar as possible for all evaluated elements. This will establish a common base line for unit performance.

h. Task Steps and Performance Measures. This is a listing of actions that is required to complete the task. These actions are stated in terms of observable performance for evaluating training proficiency. The task steps are arranged sequentially along with supporting individual tasks and their reference. Leader tasks within each T&EO are indicated by an asterisk (*). Under each task step are listed the performance measures that must be accomplished to correctly perform the task step. If the unit fails to correctly perform one of these task steps to standard, it has failed to achieve the overall task standard.

i. GO/NO-GO column. This column is provided for annotating the platoon's performance of the task steps. Evaluate each performance measure for a task step and place an "X" in the appropriate column. A major portion of the performance measures must be marked a "GO" for the task step to be successfully performed.

j. Task performance/evaluation summary block. This block provides the trainer a means of recording the total number of task steps and performance measures evaluated and those evaluated as "GO". It also provides the evaluator a means to rate the units demonstrated performance as a "GO" or "NO-GO". It also provides the leader with a historical record for five training iterations.

k. Supporting Individual Tasks. This is a listing of all supporting individual tasks required to correctly perform the task. Listed are the reference, tasks number, and task title.

l. OPFOR standards. These standards specify overall OPFOR performance for each collective task. These standards ensure that OPFOR soldiers accomplish meaningful training and force the training unit to perform its task to standard or "lose" to the OPFOR. The OPFOR standards specify what must be accomplished -- not how it must be accomplished. The OPFOR must always attain its task standards, using tactics consistent with the type of enemy they are portraying.

5-4. Use. The T&EOs can be used to train or evaluate a single task. Several T&EOs can be used to train or evaluate a group of tasks such as an STX or FTX.

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a route reconnaissance to obtain detailed information about the route and all adjacent terrain. The start point (SP), release point (RP), company boundaries, phase lines (PLs), lines of departure (LDs), and a limit of advance (LOA) or recon objective are specified. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the route reconnaissance in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. All specified information is collected and reported to higher headquarters as required. The company completes the reconnaissance without being detected. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Counterreconnaissance (07-OPFOR-0011)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is ordered to deny information to Blue force reconnaissance elements by active and passive means. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the counter reconnaissance IAW the OPORD and or commander's guidance. The Red force conceals friendly information through operational security (OPSEC) measures and engages and destroys Blue force reconnaissance elements.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct Hasty Ambush (07-OPFOR-1020)

CONDITION: Blue forces are conducting a combat, reconnaissance, or tracking patrol or are conducting another operation that makes them susceptible to an ambush. Blue forces are at or near 100% strength, have all authorized equipment, and may have indirect fire support available.

STANDARD: Red forces prepare an ambush site before arrival of the Blue force. The Red force surprises the Blue force, destroys personnel and or equipment, delays them, or forces them to withdraw in accordance with (IAW) orders from higher headquarters.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct an area or zone reconnaissance to obtain detailed information about the specified location and surrounding area. Coordinates for the designated area or zone and the start time are provided. Enemy contact is likely. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the area reconnaissance in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. All specified information is collected and reported to higher headquarters as required. The company commander selects a mounted or dismounted reconnaissance based on factors of mission, enemy, terrain, troops, time available, and civil considerations (METT-TC). The company reconnoiters all specified terrain within the area or zone. The company completes the reconnaissance without being detected. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Civil Disturbance (20-OPFOR-2002)

CONDITION: US forces are conducting Stability and/or Support operations in the local area. A civilian crowd demonstrates against US forces conducting an assigned mission. The crowd may consist of men of military age, or mixed groups of men, women and children. Agitators may use women and children to screen their actions to inhibit counter actions by US forces. The crowd refuses to respond to directions to disperse. The crowd is prepared to perform a wide variety of disruptive/hostile actions ranging from nonviolent civil protests to armed resistance. The crowd resists efforts by US forces to capture key leaders and organizers, to confiscate weapons, and to isolate the area. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Civilian crowd disrupts the unit's mission and prevents the unit from accomplishing its mission or civilian crowd enters an off limits area and refuses to leave. 2. Civilian crowd disrupts the units' interpreter's attempts to communicate with the crowd. 3. Additional civilian groups reinforce the demonstrators. Note: Depending on unit commander's training objectives, increases in violence may be gradual allowing the training unit to incrementally increase force or, the increase may be abrupt. 4. Civilian crowd commits violent acts causing US forces to respond with incremental use of force. 5. Civilian crowd forces US forces to reinforce the unit or abort the mission. 6. Civilian crowd provokes use of unnecessary force by US forces. 7. Civilian friendly media photographs and videotapes US forces during the civil disturbance. Note: The level of disruptive/hostile actions should not exceed that prescribed by the unit commander

TASK: Engage US Forces and Local Civilians with Sniper Fire (20-OPFOR-3009)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. In the past, factional elements operating in the unit area of operations (AO) have used snipers to disrupt unit operations and civilian traffic. A factional sniper team is positioned or moves into position to engage a US unit to disrupt traffic, unit operations, and increase hostility of US soldiers against the civilian populace. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Sniper team sets up in a well-camouflaged and concealed position.2. Sniper team is not seen until it engages the US force.3. Sniper team surprises the unit leaders, vehicle drivers, and/or civilian targets with accurate fire.4. Sniper team evacuates the area without being captured after accomplishing its mission.5. Sniper team provides factional commander information gathered during the engagement.6. Sniper team engages US forces from areas populated by civilians.

TASK: Maintain OPSEC (20-OPFOR-3010)

CONDITION: : US forces are conducting Stability and/or Support Operations (SASO) in the local area. Factional elements operating in the unit area of operations (AO) have been conducting clandestine operations against US forces in the AO. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Faction members hide operations sites from US forces.2. Faction members restrict radio transmissions to reduce vulnerability of their discovery.3. Faction forces use couriers to send messages between sites. Couriers evade apprehension.4. Faction forces detect US force efforts (e.g. Observation Posts) to observe or monitor faction activities.5. Faction members monitor US operations to provide early warning to faction sites and operations in the AO.6. Faction forces conduct electronic monitoring to gather information from US force's communications about factional activities.7. Faction forces hide weapons and equipment from US forces operating in the AO.

TASK: Reconnoiter US Force Activities (20-OPFOR-3011)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. Factional elements have been conducting operations counter to US forces in the unit area of operations (AO). Factional elements are attempting to gain information about US unit operations to enhance the faction's ability to counter US operations and to disrupt support to the local population. US forces may have hired local civilians to work on US installations or, local civilians may be making deliveries to US installations. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Faction members observe US operations to gather information on unit operations.2. Faction members search anything left behind by US forces to gain information about US operations in the AO (e.g. trash, equipment, unsecured vehicles).3. Faction member conduct electronic monitoring of unit communication networks to gather information about US forces operations.4. Civilians with access to US installations acquire information about US operations and provide it to factional forces.5. Faction members take advantage of opportunities to steal weapons, radios, and other US equipment that is left unattended without detection.

CONDITIONS: The company is conducting operations as part of a larger force and receives an operation order (OPORD) or fragmentary order (FRAGO) to reconnoiter a built-up area. Primary intelligence requirements (PIR), information requirements (IR), special information requirements (SIR), and reporting instructions are provided. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company reconnoiters the built-up area in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. All specified information is collected and reported to higher headquarters as required. The company commander selects a mounted or dismounted reconnaissance based on factors of mission, enemy, terrain, troops, time available, and civil considerations (METT-TC). The company reconnoiters all specified terrain within the built-up area. The company completes the reconnaissance without being detected. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Counterreconnaissance (07-OPFOR-0011)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is ordered to deny information to Blue force reconnaissance elements by active and passive means. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the counter reconnaissance IAW the OPORD and or commander's guidance. The Red force conceals friendly information through operational security (OPSEC) measures and engages and destroys Blue force reconnaissance elements.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend a Building (07-OPFOR-0022)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has received an order to defend a building. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems, and indirect fire support available.

STANDARD: The Red force defends the building in accordance with (IAW) the operation order and/or commander's guidance. The Red force prevents the Blue force from isolating and entering the building. The Red force blocks or canalizes the Blue force to destroy them or force them to withdraw. The Red force retains control of the designated building or counterattacks to regain and maintain control.

Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Electronic Combat (07-OPFOR-0021)

CONDITION: Red forces are conducting operations independently or as part of a larger force. All necessary personnel and equipment are available. Blue forces are conducting command and control of operations using digital equipment, radio, messenger, or other tactical communications.

STANDARD: The Red force conducts electronic combat in accordance with (IAW) the operation order and or commander's guidance. The Red force employs signals reconnaissance, electronic jamming, electronic protection measures (EPM), destruction, and electronic counter reconnaissance to disrupt Blue force command and control. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

ITERATION: 1 2 3 4 5 M (Circle)

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to assault an objective. The company is located in an assembly area. The company will provide its own security. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts a deliberate attack in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company moves tactically from the assembly area to the line of departure (LD) and then to assault, support, or breach positions using the appropriate formation and technique. The company provides supporting fires. The company suppresses enemy forces on or near the objective and assaults the objective to destroy, capture, or forces the enemy to withdraw. The company complies with the ROE.

OPFOR TASKS AND STANDARDS

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

COMMANDER/LEADER ASSESSMENT:			T	P	U		(Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a cordon and search for insurgents and sympathizers at the location and time specified. The company is provided an interpreter(s). Army aviation assets are available. Engineer and explosive ordinance demolition (EOD) assets are available. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the cordon and search in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company establishes a cordon of the designated area without being detected by the insurgents or sympathizers. The company conducts the search and captures all insurgents and enemy material within the cordon. The company complies with the ROE and or ROI.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
<p>* 1. Company leaders gain and or maintain situational understanding using information that is gathered from FORCE XXI Battle Command Brigade and Below (FBCB2), frequency modulated (FM) communications, maps, intelligence summaries, situation reports (SITREPs), and other available information sources. Conducts the search of suspected insurgents and or sympathizers, supplies, and equipment with the least inconvenience to the populace using one of three methods.</p> <p style="padding-left: 80px;">(1) Assembles inhabitants in a central location if they appear to be hostile. (This method provides the most control and simplifies the search and interrogation; however, taking inhabitants away from their dwellings encourages looting and ill feelings.)</p> <p style="padding-left: 80px;">(2) Restricts inhabitants to their homes. (This prohibits civilian movement and discourages looting, but makes control and interrogation difficult.)</p> <p style="padding-left: 80px;">(3) Controls the heads of households. (Reduces looting and ensures the search teams do not steal anything; this is the best method of searching since it is less disruptive to the inhabitants.)</p> <p style="padding-left: 40px;">b. Searches all underground and underwater areas.</p> <p style="padding-left: 40px;">c. Uses observed fire to cover any gaps in the cordon.</p> <p style="padding-left: 40px;">d. Inspects any freshly excavated ground. (It could be a hiding place.)</p> <p style="padding-left: 40px;">e. Uses mine detectors to locate metal objects underground and underwater.</p> <p>*14. Company commander controls the company's rate of search and directs reorganization as needed.</p> <p style="padding-left: 40px;">a. Employs the reserve to assist the cordon and search elements as the situation requires.</p>		

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
b. Reports the progress of the company to the higher headquarters commander. c. Enforces the ROE and or ROI. 15. Company consolidates and reorganizes as necessary. 16. Company secures captured insurgents as required. a. Uses the least force to detain the insurgents. b. Turns the insurgents over to the local police as soon as the situation allows. 17. Company treats and evacuates casualties. 18. Company processes captured documents and or equipment as required. 19. Company continues operations as directed.

OPFOR TASKS AND STANDARDS

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend a Building (07-OPFOR-0022)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has received an order to defend a building. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems, and indirect fire support available.

STANDARD: The Red force defends the building in accordance with (IAW) the operation order and/or commander's guidance. The Red force prevents the Blue force from isolating and entering the building. The Red force blocks or canalizes the Blue force to destroy them or force them to withdraw. The Red force retains control of the designated building or counterattacks to regain and maintain control. Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Evade/Resist Capture (07-OPFOR-0024)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red force soldiers are being overrun or conducting covert operations against the Blue force that makes them susceptible to capture.

STANDARD: The Red force evades/resists capture. If captured, Red force personnel refrain from divulging information about their operations/unit and attempt to escape using every means available.

Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

ITERATION: 1 2 3 4 5 M (Circle)
COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to delay the enemy for a specific time. The enemy can attack by air, indirect fire, and ground (mounted or dismounted). All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the delay in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or commander's guidance. The company occupies initial delay positions, forces the enemy to slow his advance, complies with all control measures, and disengages from the enemy as directed. The company does not become decisively engaged. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.
 Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR).
 Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

ITERATION: 1 2 3 4 5 M (Circle)

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a guard mission (either stationary or moving). Additional maneuver, combat support (CS), and combat service support (CSS) assets have been task organized to the company. All necessary company personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the guard mission in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance and or priority. The company destroys the enemy advance guard. The company maintains contact with enemy forces and reports activity in the area of operations (AO). The company maintains continuous surveillance of assigned avenues of approach in the AO under all visibility conditions. The company impedes and harasses the enemy using available systems and support. The company causes the enemy main body to deploy, and then reports its direction of movement. The company allows no enemy ground element to pass through the security area undetected and unreported. The company destroys or causes the withdrawal of all enemy reconnaissance patrols. The company maintains contact with the main body and any other security forces operating on its flanks. The company uses all available means, including decisive engagement, to prevent the enemy from penetrating to a position where it could observe and engage the main body. The company operates within the range of the main body's fire support weapons. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Counterreconnaissance (07-OPFOR-0011)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is ordered to deny information to Blue force reconnaissance elements by active and passive means. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the counter reconnaissance IAW the OPORD and or commander's guidance. The Red force conceals friendly information through operational security (OPSEC) measures and engages and destroys Blue force reconnaissance elements.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a linkup at the location and time specified. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the linkup in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company conducts necessary coordination, confirms command relationship with the linkup element, moves tactically to the linkup site, and establishes communications with the linkup element short of the linkup site. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about is operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.
Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR).
Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend (07-OPFOR-0019)

CONDITION: Red forces are conducting defensive operations independently or as part of a larger force. Red forces are occupying key terrain and is in prepared fighting positions. All assigned equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force conducts the defense in accordance with (IAW) the operation order and or commander's guidance. The Red force defeats, repels, disrupts, or destroys attacking Blue forces and retains key terrain. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Counterreconnaissance (07-OPFOR-0011)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is ordered to deny information to Blue force reconnaissance elements by active and passive means. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the counter reconnaissance IAW the OPORD and or commander's guidance. The Red force conceals friendly information through operational security (OPSEC) measures and engages and destroys Blue force reconnaissance elements.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Infiltration/Exfiltration (07-OPFOR-0018)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force infiltrates/exfiltrates personnel through Blue force lines. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the infiltration/exfiltration in accordance with (IAW) the operation order and/or commander's guidance. The Red force determines gaps in Blue force lines/defenses and infiltrates/exfiltrates without being detected. The Red force accomplishes the commander's intent (gains information, attacks a position(s) from the rear, conducts raids or ambushes, captures prisoners, seizes key terrain, or aids the main attack). Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Defend an Obstacle (07-OPFOR-0020)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has employed obstacles and is covering them with direct and indirect fires. All necessary personnel and equipment are available. Blue forces have indirect fire support available.

STANDARD: The Red force defends obstacles in accordance with (IAW) the operation order and/or commander's guidance. Red forces cover the obstacle(s) by fire. Red forces fixes Blue forces in the obstacle(s) and destroy them by fires. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

SUPPORTING COLLECTIVE TASKS: NONE**OPFOR TASKS AND STANDARDS**

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.
Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) directing it to disengage and withdraw immediately from the enemy and reposition for another mission. The withdrawal may or may not be conducted under enemy pressure and is unassisted. Indirect fire support is available. The company is directed to designate a detachment left in contact (DLIC). All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the withdrawal in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company disengages and moves to a designated location where the enemy cannot observe or engage it with direct fire. The company designates a DLIC. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Counterattack (07-OPFOR-0028)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have been ordered to counterattack following a disrupted or halted Blue force penetration attempt or while the Blue force is consolidating and reorganizing on the objective. All assigned Red force equipment and personnel are available. Red forces have indirect fire and engineer support available. Red forces have gained air superiority.

STANDARD: The Red force conducts the counterattack IAW the OPORD and or commander's guidance. The Red force uses short but intense artillery and air preparation, attacks Blue force flanks or rear, and or exploits gaps and ruptures in Blue force formations. The Red force prevents consolidation and reorganization and evacuation of wounded Blue force personnel. The Red force gains/regains terrain and destroys or captures remaining Blue force personnel and equipment.

Note: During training exercises, the Blue force commander/leaders should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR). Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations. Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Infiltration/Exfiltration (07-OPFOR-0018)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force infiltrates/exfiltrates personnel through Blue force lines. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the infiltration/exfiltration in accordance with (IAW) the operation order and/or commander's guidance. The Red force determines gaps in Blue force lines/defenses and infiltrates/exfiltrates without being detected. The Red force accomplishes the commander's intent (gains information, attacks a position(s) from the rear, conducts raids or ambushes, captures prisoners, seizes key terrain, or aids the main attack). Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct an infiltration and or exfiltration. The purpose of the infiltration/exfiltration (gather information, attack an enemy position from the rear, conduct a raid or ambush, capture prisoners, seize key terrain, or aid the main attack) is identified by higher headquarters. All necessary personnel and equipment are available. The company has been assigned a company lane or zone. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions.

Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company conducts the infiltration and or exfiltration in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company employs reconnaissance patrols to find routes, gaps, and weaknesses in enemy positions. The company moves through the enemy area without being detected. The company accomplishes the designated purpose of the mission. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

ITERATION: 1 2 3 4 5 (Circle)

COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct one or more security operations at the location and time specified. All necessary personnel and equipment are available. Local populace and factions may or may not be cooperative. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. This task should not be trained in MOPP4.

TASK STANDARDS: The company conducts security operations in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company establishes a force presence throughout the area of operations (AO). The company commander designates a quick reaction force (QRF). The company establishes an information-gathering network, secures routes, operates checkpoints, enforces curfews, conducts inspections and searches, and stabilizes the area as required. The company complies with the ROE and or ROI.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
Note: Security operations, in a stability environment, assure the local population of the commitment of US forces to enforce the peace mandate or other agreements. Security operations require U.S. Forces to be seen and to interact with the local population to obtain and provide information. Stabilization requires that civilians have

OPFOR TASKS AND STANDARDS

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Infiltration/Exfiltration (07-OPFOR-0018)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force infiltrates/exfiltrates personnel through Blue force lines. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the infiltration/exfiltration in accordance with (IAW) the operation order and/or commander's guidance. The Red force determines gaps in Blue force lines/defenses and infiltrates/exfiltrates without being detected. The Red force accomplishes the commander's intent (gains information, attacks a position(s) from the rear, conducts raids or ambushes, captures prisoners, seizes key terrain, or aids the main attack). Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Civil Disturbance (20-OPFOR-2002)

CONDITION: US forces are conducting Stability and/or Support operations in the local area. A civilian crowd demonstrates against US forces conducting an assigned mission. The crowd may consist of men of military age, or mixed groups of men, women and children. Agitators may use women and children to screen their actions to inhibit counter actions by US forces. The crowd refuses to respond to directions to disperse. The crowd is prepared to perform a wide variety of disruptive/hostile actions ranging from nonviolent civil protests to armed resistance. The crowd resists efforts by US forces to capture key leaders and organizers, to confiscate weapons, and to isolate the area. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Civilian crowd disrupts the unit's mission and prevents the unit from accomplishing its mission or civilian crowd enters an off limits area and refuses to leave. 2. Civilian crowd disrupts the units' interpreter's attempts to communicate with the crowd. 3. Additional civilian groups reinforce the demonstrators. Note: Depending on unit commander's training objectives, increases in violence may be gradual allowing the training unit to incrementally increase force or, the increase may be abrupt. 4. Civilian crowd commits violent acts causing US forces to respond with incremental use of force. 5. Civilian crowd forces US forces to reinforce the unit or abort the mission. 6. Civilian crowd provokes use of unnecessary force by US forces. 7. Civilian friendly media photographs and videotapes US forces during the civil disturbance. Note: The level of disruptive/hostile actions should not exceed that prescribed by the unit commander

TASK: Resist Search and Seizure (20-OPFOR-2005)

CONDITION: US forces conducting Stability and/or Support operations in the local area encounter a one or more civilian men and/or women during the conduct of a mission. The civilian's actions raise suspicions that he or she has something to hide. The civilians do not have proper identification documents. The civilian resists being searched or detained. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. The civilian uses forged identification paper to avoid apprehension. 2. The civilian resists search. 3. The civilian demands a non-contact search. 4. The civilian conceals sensitive material prior to search/seizure. 5. The civilian draws attention of other civilians and attempts to embarrass unit soldiers conducting the search through loud words and exaggerated behavior. 6. The civilian avoids being detained.

TASK: Conceal Prohibited Equipment, Material or Weapons (20-OPFOR-2005A)

CONDITION: US forces conducting Stability and/or Support operations in the local area encounter one or more civilian men and/or women during the conduct of a mission. The civilian's actions raise suspicions that he or she has something to hide. The civilians do not have proper identification documents. The civilians have sensitive documents, weapons, or equipment of intelligence value to US forces concealed in their vehicle or on their person. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Civilians avoid search by use of improper or forged identification papers. 2. Civilians successfully conceal prohibited equipment, material or weapons. 3. If discovered, the civilians provide no information about any items found. 4. Civilians are not detained.

TASK: Conceal Equipment, Material, Weapons, and Contraband (20-OPFOR-3006)

CONDITION: US forces are conducting Stability and Support operations in a unit area of operations (AO). Factional elements hostile to US force occupation and the peace mandate are attempting to conceal weapons and/or other contraband in buildings and vehicles to allow factional forces to conduct future operations in the local area. Some local inhabitants support with the factional forces. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. Civilians conceal contraband and factional equipment and weapons in buildings, vehicles or in uninhabited areas.² Civilians do not provide information to US forces on location of contraband or weapons.³ Civilians or factional elements move concealed equipment, material, weapons or contraband to new locations to prevent its discovery by US forces.⁴ US forces do not find the weapons or contraband.

TASK: Evade US Forces (20-OPFOR-3006A)

CONDITION: US forces conducting stability and support operations in the local area have identified elements or individuals for detention and questioning. With some support from sympathetic local civilians, these factional elements and individuals are attempting to evade US forces by moving to different locations at irregular intervals. Occasionally, sympathetic civilians have hidden individuals in their homes or other buildings. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. Individuals and factional elements move undetected within the unit AO.² Individuals evade search and detention by using false identification papers.³ Individuals use disguises to avoid apprehension by US forces.⁴ Civilians sympathetic to the evaders cause do not provide information about the evading individuals and elements.⁵ If captured, individuals attempt to escape and do not divulge any information useful to US forces.⁶ US forces do not apprehend any of the identified personnel or elements.

TASK: Smuggle Contraband Through a Roadblock or Checkpoint (20-OPFOR-3008)

CONDITION: US forces are conducting Stability and/or Support operations. US forces are operating checkpoints or roadblocks in the local area. Civilians smuggle prohibited equipment, material or weapons through a checkpoint or around a roadblock on foot and in vehicles. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. Civilians in a vehicle smuggle prohibited equipment, material or weapons around a roadblock.² Civilians in a vehicle smuggle prohibited equipment, material or weapons through a checkpoint.³ Civilian allows discovery of contraband material or weapon at the roadblock or checkpoint.⁴ Civilian pedestrians smuggle contraband through a checkpoint.⁵ Civilians transport contraband in a booby-trapped vehicle through or around a roadblock/checkpoint (To provide proper cues to US forces, contraband should be carefully hidden so it will be discovered so that US forces will search and find the booby trap.).NOTE: Safety measures must be exercised in operation of vehicles in vicinity of dismounted soldiers.

TASK: Engage US Forces and Local Civilians with Sniper Fire (20-OPFOR-3009)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. In the past, factional elements operating in the unit area of operations (AO) have used snipers to disrupt unit operations and civilian traffic. A factional sniper team is positioned or moves into position to engage a US unit to disrupt traffic, unit operations, and increase hostility of US soldiers against the civilian populace. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Sniper team sets up in a well-camouflaged and concealed position.2. Sniper team is not seen until it engages the US force.3. Sniper team surprises the unit leaders, vehicle drivers, and/or civilian targets with accurate fire.4. Sniper team evacuates the area without being captured after accomplishing its mission.5. Sniper team provides factional commander information gathered during the engagement.6. Sniper team engages US forces from areas populated by civilians.

TASK: Reconnoiter US Force Activities (20-OPFOR-3011)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. Factional elements have been conducting operations counter to US forces in the unit area of operations (AO). Factional elements are attempting to gain information about US unit operations to enhance the faction's ability to counter US operations and to disrupt support to the local population. US forces may have hired local civilians to work on US installations or, local civilians may be making deliveries to US installations. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Faction members observe US operations to gather information on unit operations.2. Faction members search anything left behind by US forces to gain information about US operations in the AO (e.g. trash, equipment, unsecured vehicles).3. Faction member conduct electronic monitoring of unit communication networks to gather information about US forces operations.4. Civilians with access to US installations acquire information about US operations and provide it to factional forces.5. Faction members take advantage of opportunities to steal weapons, radios, and other US equipment that is left unattended without detection.

OPFOR TASKS AND STANDARDS

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR).

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Counterreconnaissance (07-OPFOR-0011)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is ordered to deny information to Blue force reconnaissance elements by active and passive means. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the counter reconnaissance IAW the OPORD and or commander's guidance. The Red force conceals friendly information through operational security (OPSEC) measures and engages and destroys Blue force reconnaissance elements.

Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Counterattack (07-OPFOR-0028)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have been ordered to counterattack following a disrupted or halted Blue force penetration attempt or while the Blue force is consolidating and reorganizing on the objective. All assigned Red force equipment and personnel are available. Red forces have indirect fire and engineer support available. Red forces have gained air superiority.

STANDARD: The Red force conducts the counterattack IAW the OPORD and or commander's guidance. The Red force uses short but intense artillery and air preparation, attacks Blue force flanks or rear, and or exploits gaps and ruptures in Blue force formations. The Red force prevents consolidation and reorganization and evacuation of wounded Blue force personnel. The Red force gains/regains terrain and destroys or captures remaining Blue force personnel and equipment. Note: During training exercises, the Blue force commander/leaders should select the size of the Red force element based on threat doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation. Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to defend. The order requires the company commander to designate a reserve force. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company employs a reserve force in accordance with tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company commander designates the reserve force, gives them a "be prepared" mission, and commits the reserve at the decisive place and time. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR). Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Obstacle Breach (07-OPFOR-0026)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are on the offense and encounter a minefield or other obstacle that it cannot bypass. All necessary personnel and equipment are available. Red forces have indirect fire and close air support available.

STANDARD: The Red force executes the breach IAW the OPORD and or commander's guidance. Red force engineers conduct reconnaissance of the obstacle and the combined arms unit breaches the obstacle. Note: The Movement Support Detachment (MSD) has the task of mine clearing during the march. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Terrorist and Saboteur Attacks (07-OPFOR-0016)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has dispatched small teams into Blue force rear area to disrupt combat service support (CSS) operations. All necessary personnel and equipment are available. The red force has indirect fire support available.

STANDARD: The Red force locates Blue force rear support bases and command and control (C2) facilities. The Red force destroys supplies and equipment, delays and disrupts CSS operations, and or inflicts casualties through probes in accordance with (IAW) the operation order and or commander's guidance.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Infiltration/Exfiltration (07-OPFOR-0018)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force infiltrates/exfiltrates personnel through Blue force lines. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the infiltration/exfiltration in accordance with (IAW) the operation order and/or commander's guidance. The Red force determines gaps in Blue force lines/defenses and infiltrates/exfiltrates without being detected. The Red force accomplishes the commander's intent (gains information, attacks a position(s) from the rear, conducts raids or ambushes, captures prisoners, seizes key terrain, or aids the main attack). Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

OPFOR TASKS AND STANDARDS

TASK: Pass Through A Roadblock or Checkpoint (20-OPFOR-2003)

CONDITION: US forces are conducting Stability and/or Support operations. US forces are operating checkpoints or roadblocks in the local area. Civilians without proper authorization are attempting to pass through the checkpoints or bypass the roadblocks on foot and in vehicles. Some civilians will have credible forged identification papers and some civilians will have proper identification papers. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Civilians in a vehicle pass through a checkpoint without proper identification. 2. Civilian pedestrians or civilians in vehicles fail to stop when instructed by US forces. 3. Civilians in a vehicle turn around to avoid the roadblock or checkpoint. 4. Civilians in a vehicle or on foot bypass a roadblock. 5. Civilians using forged identification cards pass through the checkpoint. 6. Pedestrians without proper identification pass through the checkpoint. 7. Civilians with proper identification papers pass through a checkpoint or around a roadblock. 8. Civilians drive a booby-trapped vehicle through or around a roadblock or checkpoint. Note: Safety measures must be exercised in operation of vehicles in vicinity of dismounted soldiers.

TASK: Resist Search and Seizure (20-OPFOR-2005)

CONDITION: US forces conducting Stability and/or Support operations in the local area encounter a one or more civilian men and/or women during the conduct of a mission. The civilian's actions raise suspicions that he or she has something to hide. The civilians do not have proper identification documents. The civilian resists being searched or detained. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. The civilian uses forged identification paper to avoid apprehension.² The civilian resists search.³ The civilian demands a non-contact search.⁴ The civilian conceals sensitive material prior to search/seizure.⁵ The civilian draws attention of other civilians and attempts to embarrass unit soldiers conducting the search through loud words and exaggerated behavior.⁶ The civilian avoids being detained.

TASK: Conceal Equipment, Material, Weapons, and Contraband (20-OPFOR-3006)

CONDITION: US forces are conducting Stability and Support operations in a unit area of operations (AO). Factional elements hostile to US force occupation and the peace mandate are attempting to conceal weapons and/or other contraband in buildings and vehicles to allow factional forces to conduct future operations in the local area. Some local inhabitants support with the factional forces. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. Civilians conceal contraband and factional equipment and weapons in buildings, vehicles or in uninhabited areas.² Civilians do not provide information to US forces on location of contraband or weapons.³ Civilians or factional elements move concealed equipment, material, weapons or contraband to new locations to prevent its discovery by US forces.⁴ US forces do not find the weapons or contraband.

TASK: Evade US Forces (20-OPFOR-3006A)

CONDITION: US forces conducting stability and support operations in the local area have identified elements or individuals for detention and questioning. With some support from sympathetic local civilians, these factional elements and individuals are attempting to evade US forces by moving to different locations at irregular intervals. Occasionally, sympathetic civilians have hidden individuals in their homes or other buildings. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply¹. Individuals and factional elements move undetected within the unit AO.² Individuals evade search and detention by using false identification papers.³ Individuals use disguises to avoid apprehension by US forces.⁴ Civilians sympathetic to the evaders cause do not provide information about the evading individuals and elements.⁵ If captured, individuals attempt to escape and do not divulge any information useful to US forces.⁶ US forces do not apprehend any of the identified personnel or elements.

TASK: Engage US Forces and Local Civilians with Sniper Fire (20-OPFOR-3009)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. In the past, factional elements operating in the unit area of operations (AO) have used snipers to disrupt unit operations and civilian traffic. A factional sniper team is positioned or moves into position to engage a US unit to disrupt traffic, unit operations, and increase hostility of US soldiers against the civilian populace. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Sniper team sets up in a well-camouflaged and concealed position.2. Sniper team is not seen until it engages the US force.3. Sniper team surprises the unit leaders, vehicle drivers, and/or civilian targets with accurate fire.4. Sniper team evacuates the area without being captured after accomplishing its mission.5. Sniper team provides factional commander information gathered during the engagement.6. Sniper team engages US forces from areas populated by civilians.

TASK: Reconnoiter US Force Activities (20-OPFOR-3011)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. Factional elements have been conducting operations counter to US forces in the unit area of operations (AO). Factional elements are attempting to gain information about US unit operations to enhance the faction's ability to counter US operations and to disrupt support to the local population. US forces may have hired local civilians to work on US installations or, local civilians may be making deliveries to US installations. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. Faction members observe US operations to gather information on unit operations.2. Faction members search anything left behind by US forces to gain information about US operations in the AO (e.g. trash, equipment, unsecured vehicles).3. Faction member conduct electronic monitoring of unit communication networks to gather information about US forces operations.4. Civilians with access to US installations acquire information about US operations and provide it to factional forces.5. Faction members take advantage of opportunities to steal weapons, radios, and other US equipment that is left unattended without detection.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend (07-OPFOR-0019)

CONDITION: Red forces are conducting defensive operations independently or as part of a larger force. Red forces are occupying key terrain and is in prepared fighting positions. All assigned equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force conducts the defense in accordance with (IAW) the operation order and or commander's guidance. The Red force defeats, repels, disrupts, or destroys attacking Blue forces and retains key terrain. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Defend a Building (07-OPFOR-0022)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has received an order to defend a building. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems, and indirect fire support available.

STANDARD: The Red force defends the building in accordance with (IAW) the operation order and/or commander's guidance. The Red force prevents the Blue force from isolating and entering the building. The Red force blocks or canalizes the Blue force to destroy them or force them to withdraw. The Red force retains control of the designated building or counterattacks to regain and maintain control.

Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about is operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Counterattack (07-OPFOR-0028)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have been ordered to counterattack following a disrupted or halted Blue force penetration attempt or while the Blue force is consolidating and reorganizing on the objective. All assigned Red force equipment and personnel are available. Red forces have indirect fire and engineer support available. Red forces have gained air superiority.

STANDARD: The Red force conducts the counterattack IAW the OPORD and or commander's guidance. The Red force uses short but intense artillery and air preparation, attacks Blue force flanks or rear, and or exploits gaps and ruptures in Blue force formations. The Red force prevents consolidation and reorganization and evacuation of wounded Blue force personnel. The Red force gains/regains terrain and destroys or captures remaining Blue force personnel and equipment.

Note: During training exercises, the Blue force commander/leaders should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend a Battle Position (07-OPFOR-0032)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is in a hasty or deliberate occupation of a battle position (BP), which may or may not be supported by obstacles. It observes advancing Blue forces or is alerted to Blue forces in the area by a spot report from higher headquarters. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems and indirect fire support available.

STANDARD: Red forces complete all defensive preparations NLT the time specified in accordance with (IAW) the operation order and/or commander's guidance. Blue forces do not surprise the Red force main body. Red forces destroy, block, or canalize the Blue force when they enter the engagement area. Red forces retain control of the designated terrain and force the withdrawal of the Blue force. Red forces prevent destruction of obstacles. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Defend (07-OPFOR-0019)

CONDITION: Red forces are conducting defensive operations independently or as part of a larger force. Red forces are occupying key terrain and is in prepared fighting positions. All assigned equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force conducts the defense in accordance with (IAW) the operation order and or commander's guidance. The Red force defeats, repels, disrupts, or destroys attacking Blue forces and retains key terrain. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Defend an Obstacle (07-OPFOR-0020)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has employed obstacles and is covering them with direct and indirect fires. All necessary personnel and equipment are available. Blue forces have indirect fire support available.

STANDARD: The Red force defends obstacles in accordance with (IAW) the operation order and/or commander's guidance. Red forces cover the obstacle(s) by fire. Red forces fixes Blue forces in the obstacle(s) and destroy them by fires. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Defend a Building (07-OPFOR-0022)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has received an order to defend a building. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems, and indirect fire support available.

STANDARD: The Red force defends the building in accordance with (IAW) the operation order and/or commander's guidance. The Red force prevents the Blue force from isolating and entering the building. The Red force blocks or canalizes the Blue force to destroy them or force them to withdraw. The Red force retains control of the designated building or counterattacks to regain and maintain control.

Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

CONDITIONS: The company is conducting operations as part of a larger force and has received an operation order (OPORD) or fragmentary order (FRAGO) to conduct a mission requiring the company commander to conduct direct fires planning and employment. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company plans and integrates direct fires in accordance with (IAW) tactical standing operating procedures (TSOP), the order, higher commander's guidance, and current doctrine. The company commander plans to mass and distribute direct fires that will accomplish the intent of the higher commander, avoid target overkill, minimize friendly exposure, and prevent fratricide. The company commander employs the appropriate weapon for the type of target engaged. The company complies with the ROE and or ROI.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Raid (07-OPFOR-0013)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are occupying an objective rally point (ORP) with orders to conduct a raid against Blue force elements. All assigned Red force equipment and personnel are available. The Red force has indirect fire support available.

STANDARD: The Red force executes the raid IAW the OPORD and or commander's guidance. The Red force uses surprise, firepower, and maneuver to destroy Blue force position(s), capture prisoners, capture equipment, or free prisoners friendly to the Red force. The Red force avoids decisive engagement and withdraws all personnel from the objective(s) within the specified time. Red forces obtain all required priority intelligence requirements (PIR). Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Execute Actions on Contact (07-OPFOR-0015)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Red forces make contact with Blue forces by receipt of direct fires, indirect fires, or direct observation. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force executes actions on contact IAW the OPORD and or commander's guidance. The Red force conducts fire and maneuver to rapidly rout the Blue force, seize the initiative, and create advantageous conditions for subsequent operations. Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Infiltration/Exfiltration (07-OPFOR-0018)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force infiltrates/exfiltrates personnel through Blue force lines. All necessary personnel and equipment are available.

STANDARD: The Red force conducts the infiltration/exfiltration in accordance with (IAW) the operation order and/or commander's guidance. The Red force determines gaps in Blue force lines/defenses and infiltrates/exfiltrates without being detected. The Red force accomplishes the commander's intent (gains information, attacks a position(s) from the rear, conducts raids or ambushes, captures prisoners, seizes key terrain, or aids the main attack). Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Defend (07-OPFOR-0019)

CONDITION: Red forces are conducting defensive operations independently or as part of a larger force. Red forces are occupying key terrain and is in prepared fighting positions. All assigned equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force conducts the defense in accordance with (IAW) the operation order and or commander's guidance. The Red force defeats, repels, disrupts, or destroys attacking Blue forces and retains key terrain. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

TASK: Defend an Obstacle (07-OPFOR-0020)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force has employed obstacles and is covering them with direct and indirect fires. All necessary personnel and equipment are available. Blue forces have indirect fire support available.

STANDARD: The Red force defends obstacles in accordance with (IAW) the operation order and/or commander's guidance. Red forces cover the obstacle(s) by fire. Red forces fixes Blue forces in the obstacle(s) and destroy them by fires. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct a Counterattack (07-OPFOR-0028)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have been ordered to counterattack following a disrupted or halted Blue force penetration attempt or while the Blue force is consolidating and reorganizing on the objective. All assigned Red force equipment and personnel are available. Red forces have indirect fire and engineer support available. Red forces have gained air superiority.

STANDARD: The Red force conducts the counterattack IAW the OPOD and or commander's guidance. The Red force uses short but intense artillery and air preparation, attacks Blue force flanks or rear, and or exploits gaps and ruptures in Blue force formations. The Red force prevents consolidation and reorganization and evacuation of wounded Blue force personnel. The Red force gains/regains terrain and destroys or captures remaining Blue force personnel and equipment. Note: During training exercises, the Blue force commander/leaders should select the size of the Red force element based on threat doctrine.

TASK: Defend a Battle Position (07-OPFOR-0032)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is in a hasty or deliberate occupation of a battle position (BP), which may or may not be supported by obstacles. It observes advancing Blue forces or is alerted to Blue forces in the area by a spot report from higher headquarters. All necessary personnel and equipment are available. The Red force has automatic weapons, antiarmor systems and indirect fire support available.

STANDARD: Red forces complete all defensive preparations NLT the time specified in accordance with (IAW) the operation order and/or commander's guidance. Blue forces do not surprise the Red force main body. Red forces destroy, block, or canalize the Blue force when they enter the engagement area. Red forces retain control of the designated terrain and force the withdrawal of the Blue force. Red forces prevent destruction of obstacles. Note: During training exercises, the Blue force commander/leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Conduct an Attack (07-OPFOR-0012)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces have determined that Blue forces are occupying defensive positions, conducting convoy operations, occupying an assembly or rear area, or are otherwise susceptible to attack. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the attack IAW the OPORD and or commander's guidance. The Red force executes the attack by completely neutralizing, destroying, deceiving, or disrupting Blue forces at the designated time and location specified in the operation order and or commander's guidance. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Sniper Operations (07-OPFOR-0017)

CONDITION: Red forces are conducting operations independently or as part of a larger force and are ordered to conduct sniper operations against Blue force elements. Blue force elements are occupying an assembly area, conducting tactical movement, conducting a tactical road march, or are otherwise susceptible to a sniper attack. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts sniper operations IAW the OPORD and or commander's guidance. Red force snipers set up well-concealed locations and engage Blue force personnel with short bursts of semiautomatic fire. Red force snipers delay or disrupt Blue force activities and or kill Blue force personnel. Red force snipers prevent their position from being discovered. Red force snipers report all specified intelligence requirements to higher HQ. Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Air Attack (07-OPFOR-0029)

CONDITION: Red forces are conducting offensive operations independently or as part of a larger force. Blue force positions, formations, or soldiers have been identified and are susceptible to air attack. All necessary personnel and equipment are available. Red force fixed wing combat aircraft and attack helicopters are available to provide aerial fire support to ground maneuver forces.

STANDARD: The Red force executes the air attack using fixed and rotor winged aircraft IAW the OPORD and or commander's guidance. Blue force positions, formations, and or soldiers are destroyed, delayed, or forced to retreat.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Evade/Resist Capture (07-OPFOR-0024)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red force soldiers are being overrun or conducting covert operations against the Blue force that makes them susceptible to capture.

STANDARD: The Red force evades/resists capture. If captured, Red force personnel refrain from divulging information about their operations/unit and attempt to escape using every means available. Note: During training exercises, the Blue force commander/leader can select the size of the Red force element his unit will face based on current doctrine.

TASK: Employ Deception Measures (07-OPFOR-0030)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are ordered to employ deception measures to confuse Blue forces and to prevent them from determining Red force intentions or activities. All assigned Red force equipment and personnel are available. Red forces have indirect fire, close air, and engineer support available.

STANDARD: The Red force employs deception measures IAW the OPORD and or commander's guidance. The Red force constructs dummy positions; simulates troop movements by such means as use of civilian vehicles to portray movement to radar or marching refugees to portray movement of troops in the rear; conducts feints or demonstrations; employs manipulative, simulative, and imitative deception electronic measures; and or avoids patterns or obvious movements that reveal the time or intent of an operation.

Note: During training exercises, the Blue force commander and or leader should select the size of the Red force element based on threat doctrine.

OPFOR TASKS AND STANDARDS

TASK: Resolve Dispute on Faction Terms (20-OPFOR-2001A)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. Factional element(s) are engaged in negotiations with US forces. Faction member has requested the negotiating session to obtain favorable treatment and further faction goals and objectives. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.
 1. Faction members state their position in clear, unambiguous terms and argue for those positions.
 2. Faction members do not accept any compromise that is not favorable to the faction's position.
 3. Faction members refuse to discuss any issues that interfere with faction goals or objectives.

TASK: Disrupt Coordination or Negotiations (20-OPFOR-2006)

CONDITION: US forces are conducting Stability and/or Support operations in the local area. Belligerent factions that have agreed to the presence of the Stability Operations force have been interfering with unit operations. The unit is conducting formal and informal meetings with faction leaders to ensure freedom of movement of local civilians and US Forces. The factional element wants to continue controlling the area and the local inhabitants. Faction members are attempting to disrupt these coordination meetings. Factional elements attempt to use the coordination meeting agreements to further factional causes. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Faction members or crowds disrupt the coordination meetings by demonstrating outside the meeting location and/or being loud and abusive to local leadership and US forces. 2. Faction members or crowds disrupt coordination meetings by forcing their way into the meeting site and/or denying access to meeting locations. 3. Faction representatives agree to a meeting but routinely fail to arrive at the agreed upon time. 4. Faction members demand preferential treatment over other participants. 5. Faction representatives present contentious issues that are beyond the scope of the negotiation and are designed to delay resolution of disputes or problems or, enhance faction legitimacy. 6. Faction representative refuses to support previous agreements.

TASK: Cooperate with US Authorities (20-OPFOR-2997A)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. A non-government Organization (NGO) and/or a Private Voluntary Organization (PVO) are conducting operations within the unit's area of operations (AO). The NGO/PVO requires the support of US forces to conduct its humanitarian relief or assistance operations. NGO/PVO operations are considered supportive to the unit's mission. NGO/PVO personnel are cooperative. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. NGO/PVO element specifies support requirements to continue humanitarian relief or assistance operations in the local area to US unit or liaison officer. 2. NGO/PVO conducts coordination meetings with US unit to refine support requirements and establish process/procedures for support of the NGO/PVO. 3. NGO/PVO responds to selected requests for information from US forces. 4. NGO/PVO successfully conducts operations in the local area that support the US force SASO.

 (FM 7-85)

ITERATION: 1 2 3 4 5 (Circle)
COMMANDER/LEADER ASSESSMENT: T P U (Circle)

CONDITIONS: The company is conducting operations as part of a larger force and is required by the situation to conduct preplanned negotiations with local factional or non-US military elements. The local factional or external military elements are willing to negotiate. Interpreters are provided by higher headquarters. All necessary company personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. This task should not be trained in MOPP4.

TASK STANDARDS: The company conducts negotiations in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The company resolves the dispute or issue or sets the conditions for future negotiations. The company complies with the ROE and or ROI.

TASK STEPS AND PERFORMANCE MEASURES	GO	NO-GO
Note: There are two general types of negotiations: SITUATIONAL and PREPLANNED. Situational negotiations are conducted in response to a requirement for on-the-spot discussion and resolution of a specific issue or problem. An example would be members of an advance guard negotiating the passage of a convoy through a checkpoint. At the company level, situational negotiations are far more common than the preplanned type. In fact, employment in stability operations requires the commander, his subordinate leaders, and other soldiers to conduct some form of negotiations almost daily. This, in turn, requires them to have a thorough understanding of the ROE and ROI.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Faction members state their position in clear, unambiguous terms and argue for those positions. 2. Faction members do not accept any compromise that is not favorable to the faction's position. 3. Faction members refuse to discuss any issues that interfere with faction goals or objectives.

TASK: Disrupt Coordination or Negotiations (20-OPFOR-2006)

CONDITION: US forces are conducting Stability and/or Support operations in the local area. Belligerent factions that have agreed to the presence of the Stability Operations force have been interfering with unit operations. The unit is conducting formal and informal meetings with faction leaders to ensure freedom of movement of local civilians and US Forces. The factional element wants to continue controlling the area and the local inhabitants. Faction members are attempting to disrupt these coordination meetings. Factional elements attempt to use the coordination meeting agreements to further factional causes. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply. 1. Faction members or crowds disrupt the coordination meetings by demonstrating outside the meeting location and/or being loud and abusive to local leadership and US forces. 2. Faction members or crowds disrupt coordination meetings by forcing their way into the meeting site and/or denying access to meeting locations. 3. Faction representatives agree to a meeting but routinely fail to arrive at the agreed upon time. 4. Faction members demand preferential treatment over other participants. 5. Faction representatives present contentious issues that are beyond the scope of the negotiation and are designed to delay resolution of disputes or problems or, enhance faction legitimacy. 6. Faction representative refuses to support previous agreements.

TASK: Cooperate with US Authorities (20-OPFOR-2997A)

CONDITION: US forces are conducting Stability and/or Support Operations (SASO) in the local area. A non-government Organization (NGO) and/or a Private Voluntary Organization (PVO) are conducting operations within the unit's area of operations (AO). The NGO/PVO requires the support of US forces to conduct its humanitarian relief or assistance operations. NGO/PVO operations are considered supportive to the unit's mission. NGO/PVO personnel are cooperative. US forces are operating under restrictive ROE. Civilians, government organizations, and the international press may be present in the area.

STANDARD: Note: Depending on the commander's training objectives, some of the OPFOR standards may not apply. Also, OPFOR "fighting" tasks have not been included in this T&EO. If the OPFOR enters into direct combat with the unit, OPFOR tasks for conventional operations would apply.1. NGO/PVO element specifies support requirements to continue humanitarian relief or assistance operations in the local area to US unit or liaison officer.2. NGO/PVO conducts coordination meetings with US unit to refine support requirements and establish process/procedures for support of the NGO/PVO.3. NGO/PVO responds to selected requests for information from US forces.4. NGO/PVO successfully conducts operations in the local area that support the US force SASO.

OPFOR TASKS AND STANDARDS

TASK: Conduct Reconnaissance (07-OPFOR-0010)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force is directed to obtain tactical information pertaining to Blue force location, disposition, intent, and or activities. All assigned Red force equipment and personnel are available. The Red force has engineer support available.

STANDARD: The Red force conducts the reconnaissance mission by penetrating Blue force outposts with mounted or dismounted patrols and obtaining and reporting required information IAW the OPORD and or commander's guidance. The Red force maintains focus; continuity; aggressiveness; timeliness; camouflage, concealment, and deception; accuracy; and reliability. Red force reconnaissance elements complete the reconnaissance mission undetected.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Maintain Operations Security (OPSEC) (07-OPFOR-0023)

CONDITION: Red forces are conducting operations independently or as part of a larger force. The Red force prevents the Blue force from obtaining information about its operations and or intent. All necessary personnel and equipment are available.

STANDARD: The Red force maintains operations security (OPSEC) in accordance with (IAW) the operation order and or commander's guidance. The Red force denies information to the Blue force by maintaining physical security, signal security, and information security. The Red force identifies and eliminates indicators that can be exploited by hostile intelligence organizations.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element his unit will face based on current doctrine.

TASK: Conduct an Ambush (07-OPFOR-0025)

CONDITION: Red forces are conducting operations independently or as part of a larger force. Red forces are directed to conduct an ambush along a suspected Blue force route or avenue of approach. All assigned Red force equipment and personnel are available. Red forces have indirect fire support available.

STANDARD: The Red force conducts the ambush IAW the OPORD and or commander's guidance. The Red force conducts aggressive maneuver from concealed positions and delivers accurate coordinated fires to kill or capture Blue force personnel and destroy, disable, or capture Blue force equipment and supplies. The Red force withdraws from the ambush site, reorganizes and consolidates, and continues with follow-on mission.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

TASK: Conduct Biological/Chemical Operations (07-OPFOR-0027)

CONDITION: Red forces are conducting defensive or offensive operations independently or as part of a larger force. A decision has been made to employ biological or chemical weapons. Wind and weather conditions are right for the employment of biological or chemical weapons. All assigned Red force equipment and personnel are available.

STANDARD: The Red force conducts biological and or chemical operations IAW the OPORD and or commander's guidance. The Red force attacks the Blue force with nerve, blood, blister, choking, incapacitant, and or irritant agents or pathogenic microbes and or microorganism toxins. The Red force delivers agents and or toxins using aircraft, multiple rocket launchers (MRLs), artillery, mines, rockets, missiles, and or special operations forces. The Red force causes disruption of Blue force operations, suspension of operations, and or casualties.

Note: During training exercises, the Blue force commander or leader should select the size of the Red force element based on threat doctrine.

CONDITIONS: The company is conducting operations as part of a larger force and is required to operate the company command post (CP) to monitor and control operations. All necessary personnel and equipment are available. The company has communications with higher, adjacent, and subordinate elements. The company has been provided guidance on the rules of engagement (ROE) and or rules of interaction (ROI). Coalition forces and noncombatants may be present in the operational environment. Some iterations of this task should be conducted during limited visibility conditions. Some iterations of this task should be performed in MOPP4.

TASK STANDARDS: The company operates the CP in accordance with (IAW) tactical standing operating procedures (TSOP), the order, and or higher commander's guidance. The CP provides communications with higher, subordinate, adjacent, and supporting units; assists the company commander in planning, coordinating, and issuing company OPORDs; and supports continuous operations by the company. The CP maintains situational understanding by receiving, processing, recording, plotting, tracking, and reporting information. The company complies with the ROE and or ROI.

CHAPTER 6

External Evaluation

6-1. General. An external evaluation is conducted to evaluate the unit's ability to perform its missions. This chapter is a guide for preparing an external evaluation. Using units may modify this evaluation, based on the factors of mission, enemy, terrain, troops, time available, and civil considerations (METT-TC) or other considerations as deemed appropriate by the commander or leader. Selected training and evaluation outlines (T&EOs) in Chapter 5 are used for evaluation that involves the total unit and employs a realistic OPFOR and the use of Multiple Integrated Laser Engagement System (MILES). At the end of the evaluation, the unit and evaluating commander or leader can identify the strengths and weaknesses of the evaluated unit. These strengths and weaknesses are the basis for future training and resource allocations.

6-2. Preparing the Evaluation. The evaluating unit commander must standardize evaluation procedures to accurately measure the unit's capabilities.

- a. Preparing the Evaluation Instrument. The sample evaluation scenario in Table 6-1 contains the tasks necessary to develop the scenario and execute the evaluation. Selective tailoring is required, because it is not possible to evaluate every task. The following procedures are suggested for developing the evaluation.

EVENT	ACTION	ESTIMATED TIME ALLOCATED		PROPOSED TIME FRAME
1	Conduct preevaluation activities (for example, install, align, and troubleshoot MILES equipment; conduct inspections, draw equipment and ammunition).	Before start time		
2	Conduct advance party activities	1 hr.	Day 1	0800
3	Move to and Occupy Assembly Area	2 hr.		0900
4	Receive OPORD	15 min.		1115
5	Plan Operations using the TLPs	2 hr.		1130
6	Prepare for Operations	30 min.		1330
7	Conduct a Rehearsal	2 hr.		1400
8	Conduct a Passage of Lines as Passing Unit	3 hr.		1600
9	Conduct a Raid	6 hr.		1900
10	Intermediate After-action Review (AAR)	1 hr.	Day 2	0130
11	Cross a Water Obstacle	2 hr.		0800
12	Assault an Objective	2 hr.		1000
13	Conduct a Defense	10 hr.		1200
14	Conduct Intermediate AAR	1 hr.		2200
15	Depart field location (Administrative move)		Day 3	0800
16	Conduct Final AAR	2 hr.		1300
Total Time: 34 hr, 45 min				
Times shown are for demonstration purposes only and should not be used for planning.

Figure 6-2. Example task summary sheet.

(3) Select the tasks for the evaluation of every mission. List the selected tasks on the Task Summary Sheets that are used for recording the results of the evaluation.

(4) Compile the selected missions and tasks in the order they logically occur in the detailed scenario. Group the selected missions and tasks in parts for continuous operations, Table 6-1, Sample Evaluation Scenario. Parts can be interrupted at logical points to assess MILES casualties and conduct in-process after-action reviews (AARs).

b. Forecasting and Requisitioning Resources. Adequate training ammunition, equipment and supplies must be forecasted and requisitioned. Table 6-2 is a consolidated list of support requirements for this evaluation. It is based on experiences with the scenario in Table 6-1. The evaluating headquarters will prepare its own consolidated support requirements.

CONSOLIDATED SUPPORT REQUIREMENTS			
<u>AMMUNITION</u>		<u>QUANTITY</u>	
5.56-mm (blank)		150 rounds/man	
5.56-mm (blank)		400/SAW

Javelin	3		1
This is an example. It is not intended to reflect all or any of the MILES equipment required by a unit to conduct an exercise.			

Table 6-2. Example consolidated support requirements.

c. Selecting and Preparing the Field Evaluation Site. Required size, type of terrain, OPFOR requirements, and administrative requirements form the basis for site selection. For this evaluation an area of _____meters X _____ meters was selected. The OPFOR is positioned according to enemy doctrine. The site must provide space for the administrative area required to support the evaluation.

d. Planning Indirect Fire Simulation. Because it greatly influences the outcome of battles, reaction to indirect fire is an important consideration of the evaluation. Indirect fire simulation requires considerable planning to achieve realism.

(1) The fire marker control system outlined in TC 25-6 is a recommended method of simulating indirect fire. Due to the amount of required resources, this method may be difficult to support.

(2) The commander may use the evaluation control headquarters method or the simulation without OPFOR method to evaluate the unit's ability to react to indirect fire. If the evaluation control headquarters method is used, the OPFOR will initiate a call for fire to the evaluation control headquarters that will simulate the tactical fire direction center (FDC). The control headquarters would then relay the delivery data to the observers and or controllers who would mark the impact of the round with artillery simulators and assess appropriate casualties. If an OPFOR is not used, the observer and or controller may ignite artillery simulators and observe the unit's reactions. FM 7-0 (25-100) and FM 7-10 (25-101) provide assessment and computation

tables which may be used to determine casualties. Indirect fire simulation must be realistic and limited to what the unit could reasonably expect under combat conditions.

6-3. Selecting and Training Observers and or Controllers.

a. Evaluators must be highly qualified to enhance the training experience for the evaluated unit by providing valid, credible observations. The evaluator should be equal or senior in rank to the leader being evaluated. Ideally, the evaluator should have held the position himself, as it lends credibility to his role.

(1) Selected observers and or controllers should as a minimum--

- (a) Be familiar with the evaluated organization's mission essential task list (METL).
- (b) Be tactically and technically proficient in the tasks evaluated.
- (c) Know the evaluation standards.
- (d) Follow the tactical and field standing operating procedures (SOPs) for the organization being evaluated.
- (e) Apply relevant information about the evaluated unit, such as wartime missions, personnel turbulence, leader fill, and equipment status.
- (f) Be trained and rehearsed.
- (g) Know the terrain. (Conduct a reconnaissance when possible).
- (h) Know opposing force (OPFOR) training objective.

c. Observer and or controller standardize administration of the evaluation by understanding the following functional areas:

(1) Evaluation Design. Each part is designed to evaluate specific missions or tasks within the overall scenario. Observer and or controller must thoroughly understand the evaluation and correctly implement it.

(2) MILES. Each observer and or controller, regardless of position, must have full knowledge of the unit's weapons and vehicles and must also thoroughly understand the MILES system being used. The unit commander is responsible for ensuring that all MILES equipment is functional before each part of the scenario.

(3) Evaluation Control System. This system ensures that the evaluation is administered in a consistent and standardized manner and that correct data is collected for the final evaluation. It includes the following elements:

- (a) Rules of engagement.
- (b) Observer and or controller duties and responsibilities.
- (c) Communication systems.
- (d) Evaluation data collection plan.

d. A recorder or recorders should be designated by the evaluation control headquarters to receive "kill" information or results and time data from the observers and or controllers.

6-4. Documentation. The evaluating headquarters develops the data recording instruments for the observers and or controllers. The Unit Data Sheet, Figure 6-3, documents demographic information that may reflect on a unit's performance. The Environmental Data Sheet, Figure 6-4, documents weather information in order to compare missions under differing environmental conditions. The Personnel and Equipment Loss Report, Figure 6-5, documents information that may affect the unit's degree of success during engagements with the OPFOR.

UNIT DATA SHEET

2. UNIT LEADERS: (CIRCLE MOST CORRECT ANSWER)

3. UNIT STRENGTH (EXCLUDING LEADERS):						
4. EQUIPMENT SHORTAGES (MAJOR ITEMS):						
5. COMMENTS:						
OBSERVER CONTROLLER'S SIGNATURE: _____						

Figure 6-3. Example unit data sheet.

- a. Selection. Any qualified Skill Level 1 or 2 soldier can serve as OPFOR. Ideally, they should be a small cohesive unit under the control of their leader or commander.
- b. Training. The OPFOR must understand the following six major areas:
 - (1) Installation and operation of the MILES devices.
 - (2) Rules of engagement (ROE).
 - (3) Enemy small unit tactics.
 - (4) Selected training scenarios.
 - (5) OPFOR weapons and equipment, if available.
 - (6) Safety procedures.
- c. OPFOR Strength.
 - (1) Offense. Using MILES, the unit should outnumber the OPFOR three to one if an attack is to be successful. If the OPFOR is stronger than this ratio, only the most exceptional unit will be successful. They must be armed with weapons capable of defeating any of the unit's assets. As a general rule, the OPFOR should be strong enough to offer the unit a realistic challenge, but one that the unit can defeat when proper tactics are employed.
 - (2) Defense. The OPFOR, at a minimum, should have a three-to-one ratio of superiority because anything less will not have sufficient weapons and ammunition to conduct a successful attack. It must be more than merely a series of targets to be destroyed. The OPFOR should be allowed to plan their own attack for each mission and not be forced into a "canned" attack that all units will quickly defeat. Once the OPFOR establishes its plan, it must use the same plan for all other like units for that event in order to maintain the objectivity and standardization of the evaluation.

6-6. Conducting the Evaluation. Evaluations are divided into three distinct areas. Each area requires a different degree of preparation and coordination.

- a. Pre-evaluation.
 - (1) The senior observer and or controller and all other observers and or controllers must recon the evaluation area to know the unit's boundaries, disposition of the OPFOR, and the most likely avenues of approach throughout the field evaluation site's area of operation.
 - (2) The unit must prepare an OPORD and FRAGO to control the exercise. An order is prepared for each mission in the evaluation scenario.
 - (3) Unit preparatory activities include installation and troubleshooting of MILES equipment, loading vehicles, conducting inspections, and performing other logistics and administrative actions as required.
 - (4) The OPFOR is placed in position and briefed while the unit is conducting its preparatory activities.
 - (5) In this evaluation scenario, the unit is issued a movement order to move to an assembly area. When the assembly area has been occupied, the OPORD is issued. The observers and or controllers should make an equipment-functions check after the unit occupies the assembly area and after the unit leaders have issued their instructions.

b. Evaluation.

(1) The evaluation team controls the evaluation in two ways. First, it uses measures established in both the movement order and in paragraphs 3 and 5 in the OPORD or FRAGO. Second, the team controls the evaluation through the team commander (simulated by the senior observer and or controller for this evaluation) on the team net. The team does not control in the traditional sense; instead, it accompanies the unit as observers. Only the senior observer and or controller has direct verbal contact with the unit commander. All other observers and or controllers do not speak to, aid, advise, point out positions, or in any way influence the unit's performance except for a possible or actual safety issue or emergency. Observers and or controllers are neutral throughout the evaluation.

(2) Once the senior observer and or controller issues the OPORD and movement order, the unit commander executes the events and actions prescribed in the first part of the evaluation scenario within the estimated time. From this point on, all successive parts begin with a FRAGO.

(3) The senior observer and or controller terminates a part when the unit has completed all the events and actions in a particular area or has suffered so many casualties or so much damage that the part cannot be completed. The observer and or controller must record the reasons for the termination in the margin of the Task Summary Sheet and report his action to the evaluation control headquarters. In the sample evaluation scenario, the completion of each event or action is followed by "conducting sustainment operations." During this period, the senior observer and or controller will direct the unit to remain in position while "replacements" (personnel and equipment designated as killed or destroyed), are sent forward to reconstitute the unit. At this time, observer and or controller must perform the following actions:

(a) Inspect all MILES equipment, record "kill" codes, and reset equipment. Any damaged or inoperative MILES equipment is replaced.

(b) Resolve all casualty data to determine the time, place, number, and cause of casualties. This information is reported to the recorder in the evaluation control headquarters.

(c) Debrief the unit to resolve questions. Afterwards, the senior observer and or controller directs the unit to continue its mission after it receives a FRAGO or OPORD for the next part.

(4) These guidelines should be followed by the observers and or controllers.

(a) Report major "kills" (vehicles, groups).

(b) Report major weapons fired. Together with reporting major kills, this is the best method for determining direct fire effectiveness. Both significant firings and hits are reported to the evaluation control headquarters.

(c) Enforce rules of engagement.

(d) Spot and record any action that might have an effect on later performance or mission outcome.

(e) Record travel routes and unit's location.

(f) Inform OPFOR controllers of the unit's location, direction, and intent. This is necessary to enable OPFOR action to be controlled in accordance with the desired sequence of events.

(g) Enforce safety.

- (h) Terminate mission at the appropriate time.
- c. Post-evaluation. After the evaluation is terminated, the unit moves to an assembly area and performs the following actions:
 - (1) The unit observer and or controller debriefs subordinate observers and or controllers and compiles all data (evaluator packets) for the evaluation.
 - (2) The unit observer and or controller must complete the task summary sheets.
 - (3) The unit observer and or controller must turn in all completed observer and or controller packets (with the observer and or controller scoring system) to control headquarters for recording and analysis.
 - (4) The unit observer and or controller must conduct an AAR of the unit's performance.
 - (5) Each element observer and or controller should conduct an AAR of his element's performance.

6-7. Conducting the AAR.

- a. General. At the completion of each evaluation part, the AAR leader provides feedback to the unit in order to increase and reinforce learning.
- b. Feedback. Because all members of the unit participate in an AAR, each member becomes a source of feedback. This provides a richer "data base" for key points. The AAR leader will draw information from each member. This information becomes an important part of the discussion and is the basis for discussing alternate courses of action.
- c. Preparing the AAR. AAR preparation involves five steps:
 - (1) Review training orders and objectives. Training objectives are the focus of the discussion of the exercise results. The FRAGOs and OPORDs included in the exercise design implement these objectives. The observer and or controller should be familiar with the objectives, FRAGOs and OPORDs so that he can note orders given by leaders of the evaluated unit and its subordinate elements that either implement these objectives or deviate from them.
 - (2) Observe the exercise. This is an active process. The emphasis is on noting those actions that make the difference between the unit's success or failure. The observer and or controller does not need to remain close to the unit leader; more can be seen from high ground near the lead element's location or along the unit's route of march. Because unit orders identify important activities and checkpoints, the observer and or controller must be present when the commander issues the order. The observer and or controller should position himself where he can best observe anticipated critical events. Examples of critical events may include:
 - (a) Conducting a road march.
 - (b) Crossing a radiologically contaminated area.
 - (c) Performing unit supply operations.
 - (d) Responding to an NBC attack.
 - (3) Select the site and assemble the participants. After the exercise, select a site for the AAR. If possible, hold the AAR where the majority of action occurred, where most of the critical events took place (normally where the OPFOR was positioned), or where the terrain can be observed.

(The OPFOR or unit objective is normally suitable for assembling the players and conducting the AAR.)

(4) Debrief observers and or controllers. While the units are moving to the selected site, observers and or controllers should be debriefed. The senior observer and or controller must have a complete understanding of what happened in the exercise. The fourth step in AAR preparation is to obtain a detailed description of the exercise events in the order in which they occurred.

(5) Review the events. After the senior observer and or controller has a sound understanding of what happened during the exercise, he reviews the events which are ranked in terms of their relevance to the training objectives and their contributions to the exercise outcome. He selects as many events as can be covered in detail during the time allowed for the AAR and places them in chronological order.

d. Conducting the AAR. Conducting the AAR requires five steps:

(1) Organize the participants. When the observer and or controller and AAR leader assembles the participants, he groups them according to their organization in the exercise. Each subordinate element's observer and or controller is located with the element for which he is responsible.

(2) State the training objectives. The AAR leader makes a brief statement of the training objectives for the exercise. These are described as specifically as possible. He states any additional teaching points that he intends to cover during the AAR. These should be limited to three or four key points in order to keep the AAR focused and prevent it from becoming excessively long.

(3) Lead the discussion. The AAR leader guides the discussion of the events in their order of occurrence. Diagrams help players visualize the exercise development. The AAR leader starts by sketching the main terrain features and as the AAR proceeds, he directs the participants to draw routes of advance, objectives, and locations of engagements. Each event is discussed in detail to make teaching points about the unit's performance during the event. In an effective AAR, the AAR leader should:

(a) Avoid giving a critique or lecture.

(b) Guide the discussion by asking leading questions.

(c) Suggest the players describe what occurred in their own terms.

(d) Suggest the players discuss not only what happened but how it happened and how it could be done better.

c. Focus the discussion to ensure that important tactical lessons are made explicit.

(f) Relate events to subsequent results.

(g) Avoid detailed examination of events not directly related to major training objectives.

(h) Encourage the participants to use diagrams to illustrate teaching points and to show routes, phase lines, and objectives.

(i) Prohibit players from offering self-serving excuses for inappropriate tactical actions.

(4) Review the sequence of the events associated with the hazards of the risk assessment made prior to the exercise.

- (a) Were effective controls put in place to avoid accidents?
 - (b) Was training realism reduced through artificial control measures?
 - (c) Were all participants aware of hazards down to the lowest level?
 - (d) Did any hazard present itself that was not identified, and what was done to overcome it?
 - (e) Discuss each incident of fratricide or near fratricide and how it can be avoided in the future.
- (5) Summarize key points. The AAR leader briefly summarizes teaching points in terms of training objectives covered in the AAR. After the summary, he can have a private conversation with the unit commander regarding his strengths and weaknesses, and what he can do to improve his performance and that of his unit. A good AAR leader:
- (a) Maintains order and discipline.
 - (b) Reviews the training objectives.
 - (c) Addresses important events as they occurred and how the unit could have done them better. During the discussion, the leader avoids a detailed examination of events not directly related to the training objective.
 - (d) Traces the chain of events so all participants understand the results of mistakes. One mistake is often the partial cause of another.
 - (e) Clearly relates tactical events to teaching points.
 - (f) Involves participants in the discussion.
 - (g) Clearly and concisely gives summary and new training objectives.
 - (h) Reinforces points by using sketches, diagrams, or terrain models in the AAR.
- e. Reference materials (FMs and training circulars [TCs]) for conducting an AAR should be reviewed.

APPENDIX A

Combined Arms Training Strategy

A-1. Development of the Combined Arms Training Strategy (CATS) is the responsibility of the proponent, not individual units. CATS should be available to the using unit through the Standard Army Training System (SATS).

A-2. CATS is the Army's overarching strategy for the current and future training of the force. It describes how the Army will train the total force to standard in the institution, unit, and through self-development. It also identifies, quantifies, and justifies the training resources required to execute the training.

A-3. CATS provides a mix of collective and individual tasks that are recommended to be trained to standard by units. CATS also provides a range of events that furnishes a menu from which units may choose as they decide how to train those tasks. Along with presenting the tasks, the CATS data contains information on recommended prerequisite tasks for a specific task and the required frequency to perform the tasks to attain proficiency. You may access this data as a guideline while working on various Standard Army Training System (SATS) modules.

A-3. During the process of developing their Mission Essential Tasks List (METL) and Essential Collective Task List (ECTL) training strategies, commanders and leaders should refer to CATS information if it is available for their unit type. As a reference, CATS can save time and effort in researching appropriate event types and types of target audience units to participate in these event types.

Note: CATS data does not include all the tasks for each of the available echelons and unit types.

A-4. The CATS and related plans, developed by the proponent, provide the means to ---

- a. Establish training requirements.
- b. Determine who (units and or individuals), when, where (site), and how (methods and or media) collective and individual critical tasks will be trained.
- c. Identify required resources for training.

C/1-62 AD(-)

1. SITUATION

a. Enemy forces. Enemy forces in the 1-5 IN (your BN) area of interest consist of a Recon company from the 82 Recon BN that is acting as the security force for the 821 Motorized Rifle Regiment (MRR). The enemy Recon company is consolidated between the grid (____) and grid (____). Its most probable course of action will be to attempt to establish a cohesive defense in our sector in order to block and disrupt the BDE's LOC in the North part of the BDE's zone. Squad size enemy combat outposts will be established forward of their main defensive belt in order to provide the Recon company with early warning and indirect fire against our BN. The exact location of the enemy Recon company and its combat outposts is unknown at this time.

b. Friendly forces.

(1) 1 BDE Intent: I intend to rapidly penetrate the security zone, then conduct a simultaneous attack to penetrate both defensive belts. We will attack with both an AR heavy (TF 3-66 AR) and a MECH IN (TF 1-22 IN) TF abreast. 1-5 IN BN (your BN) will follow and support the main attack. Upon the defeat of the 821 MRR, our end-state will have the MECH IN and AR heavy TFs positioned along PL (name) with 1-5 IN BN in reserve. The BDE will be postured to either defend against follow on forces or prepared to conduct offensive operations to the Northwest. I'll accept risk in that my reserve forces must be able to defeat bypassed Wadiland forces to allow the BDE freedom of movement.

(2) TF 1-22 IN on our South (left) will attack along Axis RED to secure OBJ WING.

(3) 2 BDE, 54 IN DIV in the North (right) will attack along Axis BLUE to secure OBJ SHEEP.

(4) TF 3-66 AR to our front will attack along Axis GREEN to secure OBJ DOVE.

c. Attachments and detachments. See task organization.

2. MISSION

1-5 IN conducts a movement to contact to locate and destroy a bypassed enemy Recon company preventing it from blocking 1 BDE's LOC's.

3. EXECUTION

Intent: I want to rapidly identify the location of the enemy Recon company and destroy it before it can establish a cohesive defense. We will accomplish this by moving with two companies abreast and one platoon in reserve following the main effort. The end-state will be the defeat of the enemy Recon company with the BN postured to support the BDEs two attacking TFs.

a. Concept of operation.

(1) Maneuver. 1-5 IN conducts a movement to contact in zone, with A/1-5 IN on the left (South) and B/1-5 (+) IN as the main effort on the right (North). 1/C/1-5 IN will follow the main effort as the BN reserve. The Recon platoon will screen forward of the two lead companies. Antitank (AT)/1-5 IN will provide overwatch fires for the lead companies. Companies are responsible for their local security. BN indirect fire assets will provide for deep fires in support of this operation. On order, attacks to destroy the enemy reconnaissance company. On order, defends.

(2) Air support. 1 BDE has 10 close air support (CAS) sorties per day for planning purposes only. 1 BDE has allocated 2 CAS sorties to 1-5 IN for planning purposes only. Priority to B/1-5 IN, then to A/1-5 IN.

(3) Fires. Priority of FA fires initially to SCTs 1-5 IN and AT/1-5 IN then to B/1-5 IN, in that order.

(4) Counter-air operations. Air defense priorities are to the BN TOC then to the maneuver companies.

(5) Intelligence. Initial priority is to identify the location of the enemy's combat outposts then on locating the enemy Recon company in zone.

(6) Electronic warfare. Priority to B/1-5 IN then shifts to A/1-5 IN on order.

(7) Engineer. Priority of support is to B/1-5 IN. Priority of effort is mobility and survivability.

b. Tasks to maneuver units.

(1) A/1-5 IN. AO is from LD/LC to PL (name) initially, shifts to PL (name) and PL (name) on order.

(2) B/1-5 IN.

(a) AO is from LD/LC to PL (name) initially, shifts to PL (name) and PL (name) on order.

(b) Prepare to receive 2nd and 3rd platoons from C/1-5.

(3) C/1-5 IN.

(a) Prepare to give 2nd and 3rd platoons to B/1-5.

- (a) Prepare to use 1st platoon as BN reserve, priority of commitment is to B/1-5 IN then to A/1-5 IN.
 - (b) Be prepared to react to rear operations.
- (4) Mortars/1-5 IN. Plan for fire beyond PL (name) initially. Priority to Recon PLT/1-5 IN then shifts to B/1-5 IN on order.
- (5) Recon PLT/1-5 IN. Screen NLT _____ from the forward edge of the lead companies to PL (name) initially, then, on order, shift to PL (name) and PL (name).
- (6) AT/1-5 IN. Provide for overwatch fires for A/1-5 IN and B/1-5 IN, priorities to B/1-5 IN.
- c. Tasks to combat support units.
- (1) A/2-8 FA (DS).
 - (a) Priority of smoke is to B/1-5 IN then to A/1-5 IN.
 - (b) Fire support.
 - 1. General. Priority of fires to deep battle then to B/1-5 IN. Counterfire priorities, in order, enemy mortars and FA affecting main effort.
 - 2. Organization for combat. No change.
 - (2) 1/A/65 EN. Priority of support is initially to B/1-5 IN, then A/1-5 IN, on order C/1-5 IN.
 - (3) 3/C/1-62 AD. Priority of protection BN TOC, then maneuver companies.
- d. Coordinating instructions.
- (1) This order is effective for planning immediately and execution on order.
 - (2) Antiterrorist actions. IAW BN TSOP.
 - (3) Air defense weapons status. Initial weapon control status is tight. 3/C/1-62 ADA protection to BN TOC, then lead maneuver companies.
 - (4) MOPP. MOPP O
 - (5) Vehicle Recognition. IAW BN TSOP.
 - (6) Be prepared to continue offensive operations to the Northwest.

4. SERVICE SUPPORT. Annex B (Service Support)

5. COMMAND AND SIGNAL

Time Zone Used Throughout the Order: Local

Task Organization: TBP

1. SITUATION

- a. Enemy forces. We will initially be opposed by elements of the 1st BDE, 4th IN DIV. In the North 1 BDE is expected to attack with an armored TF and a MECH TF abreast. 1-5 IN BN may be a follow and support force for the BDE. 1-5 IN BN can operated mounted or dismounted and is capable of movement by air assault.

2. MISSION

A/82 Recon BN will establish a security zone VIC GG070760 PL (name) in order to identify the enemy's main effort and slow the momentum of his attack through the use of indirect fires and CAS.

3. EXECUTION

- a. Concept of operation.

(1) Maneuver. Our Recon company will establish combat observation posts, VIC grid (____) and grid (____), in order to provide early warning so that we can identify the type of units and direction the enemy is attacking. We will establish a hasty defense VIC grid (____), PL (name) to slow the momentum of the enemy's attack and assist 821 MRR in identifying where the enemy will place his main effort. Our goal is to defeat the enemy's Recon elements so that they cannot identify how the regiment is defending.

(2) Fires. Priority of our fires initially will be to the combat outposts, in sector, then will shift to our Recon company in its defensive sector.

4. SERVICE SUPPORT. Annex B (Service Support).

APPENDIX C

Enemy Analysis

It is the leader's responsibility to know his enemy. Although a company or platoon may not conduct a detailed analysis of the enemy, he should request all available intelligence and terrain associated products and or information from higher headquarters.

C-1. Desired end effect of enemy analysis. Know the enemy. Develop enemy models that accurately portray how enemy forces normally execute operations and how they have reacted to similar situations in the past. Know what the enemy is capable of, given the current situation.

C-2. Update or create enemy models. Enemy models depict how enemy forces prefer to conduct operations under ideal conditions. They are based on the enemy's normal or "doctrinal" organization; equipment; doctrine; and tactics, techniques, and procedures (TTP). Enemy models result from a detailed study of the enemy force. Ideally, you construct enemy models prior to deployment. Even after deployment, however, continue to evaluate the enemy and update the enemy models as required.

a. Enemy models consist of the following three parts.

(1) Doctrinal templates.

(a) Doctrinal templates illustrate the deployment pattern and disposition preferred by the enemy's normal tactics when not constrained by the effects of the battlefield environment. They are usually scaled graphic depictions of enemy dispositions for a particular type of standard operation, such as a battalion movement to contact, an insurgent ambush, or a terrorist kidnapping.

(b) Construct doctrinal templates through an analysis of the intelligence database and an evaluation of the enemy's past operations. Determine how the enemy normally organizes for combat and how he deploys and employs his units and the various battlefield operating system (BOS) assets. Look for patterns in task organization of forces, timing, distances, relative locations, groupings, or use of the terrain or weather. Focus on major elements as well as individual high value targets (HVTs).

(c) Even unconventional operations lend themselves to graphic depiction. For example, an evaluation of the intelligence database might indicate that when robbing banks the enemy always sends four guerrillas inside with at least two guerrillas remaining outside. The four who move inside the bank usually take up positions at distinct locations within the bank. This type of information can easily be converted into a graphic representation, although not necessarily to a standard map scale.

(d) Doctrinal templates can also portray the enemy's normal organization for combat, typical supporting elements available from higher commands, frontages, depths, boundaries, engagement areas, objective depths, and other control measures. Whenever possible, convert these patterns into graphic representations such as overlays or sketches.

(2) Description of preferred tactics and options.

(a) The enemy model includes a description of the enemy's preferred tactics. It addresses the operations of the major units or elements portrayed on the template and the activities of the different battlefield operating systems. It also contains a listing or description of the options available to the enemy should the operation fail (branches) or subsequent operations if it succeeds (sequels).

- (b) Even if the enemy's preferred tactics can be depicted graphically, the enemy model includes a description. This allows the template to become more than a "snapshot in time" of the operation being depicted. It aids in mentally war-gaming the operation over its duration during the development of enemy courses of action (COAs) and situation templates.
- (c) The description should address typical time lines and phases of the operation (maneuver and support), points where units transition from one formation to another, and how each BOS contributes to the operation's success. Describe the actions of the supporting BOS in enough detail to allow the later identification of HVTs and high payoff targets (HPTs). Since the target's value usually varies with its role in each phase of the operation, ensure that you examine each phase separately.
- (d) Like the template itself, you develop the description of the enemy's tactics and options from an evaluation of his doctrine and past or current operations. Include a description of the branches and sequels normally available to or preferred by the enemy should the depicted operation succeed or fail. For example, the enemy might prefer to follow successful attacks with pursuit. Should an attack begin to fail, his preferred branches might include committing reserves, reinforcement, or shifting the main effort. Should the attack fail, his preferred tactic might be a hasty defense.
- (3) Identification of type of HVTs.
- (a) Assets that the enemy commander requires for the successful completion of the mission depicted and described on the template are HVTs.
- (b) Identify HVTs from an evaluation of the intelligence database, the doctrinal template, its supporting narrative, and the use of tactical judgment. HVTs usually (but not always) fall within the non-maneuver BOS. Develop the initial list of HVTs by mentally war-gaming and thinking through the operation under consideration and how the enemy will use the assets of each BOS to support it. Identify any that are critical to the operation's success.
- (c) For example, while mentally war-gaming an enemy air attack against friendly targets supported by a well-prepared air defense system, it is logical to assume that the enemy will need a substantial air defense suppression package as part of the strike force. In such a case, enemy aircraft commonly used in such a role become HVTs.
- (d) Identify assets that are key to executing the primary operation. Also identify any assets that are key to satisfying decision criteria or initial adoption of the branches and sequels listed in the description and option statements.
- (e) Determine how the enemy might react to the loss of each identified HVT. Consider his ability to substitute other assets as well as the likelihood of adopting branches to the operation.
- (f) After identifying the set of HVTs, rank order them with regard to their relative worth to the enemy's operation and record them as part of the enemy model. An HVT's value usually varies over the course of an operation. Identify any changes in value by phase of the operation and make the necessary annotations.
- (g) As you identify key assets, group them into one of the following 13 categories used to develop target sets.
- Command, control, and communications (C³).
 - Fire support (includes target acquisition assets, ammunition, aircraft, fire direction control, and others).

- Maneuver.
- Air defense (includes radars, processing centers, and headquarters).
- Engineer.
- Reconnaissance, intelligence, surveillance, and target acquisition (RISTA).
- NBC (includes support elements and weapons).
- Radio electronic combat (REC) or EW assets.
- Bulk fuels (storage and refueling assets).
- Ammunition storage sites and distribution points.
- Maintenance and repair units (includes collection points and mobile repair facilities).
- Lift.
- Lines of communications (LOCs) (roads, bridges, rail heads, transloading facilities, airfields, choke points, others).

b. Additional considerations.

(1) Use all available intelligence sources to update and refine enemy models. The most useful are the order of battle (OB) files. OB files contain the details that allow you to reach conclusions about the enemy's operations, capabilities, and weaknesses. The OB factors that structure the OB files are--

- (a) Composition.
- (b) Disposition.
- (c) Strength.
- (d) Tactics or modus operandi (including habitual operating areas for unconventional warfare [UW] forces, gangs, insurgencies, and so forth).
- (e) Training status.
- (f) Logistics.
- (g) Effectiveness.
- (h) Electronic technical data.
- (i) Miscellaneous data (personalities, pseudonyms, other).

C-3. Identify enemy capabilities.

a. Enemy capabilities are the broad COAs and supporting operations that the enemy can take to influence the accomplishment of the friendly mission. They take the form of statements such as--

(1) "The enemy has the capability to attack with up to 8 divisions supported by 170 daily sorties of fixed-wing aircraft."

(2) "The enemy can establish a prepared defense by 14 May." "The enemy has the ability to airmobile and insert up to 2 battalions of infantry in a single lift operation."

(3) "The drug smugglers have the capability to detect the radars used at our observation posts."

(4) "The enemy can conduct up to three separate smuggling operations simultaneously."

(5) "The protesters can effectively block traffic at no more than 7 different intersections."

b. There are generally four tactical COAs open to military forces in conventional operations.

(1) Attack.

(2) Defend.

(3) Reinforce.

(4) Conduct a retrograde.

c. Each of these broad COAs can be divided into a variety of more specific COAs. For example, an attack may be an envelopment, a penetration, or other variations of an attack. A retrograde movement may be a delaying action, a withdrawal, or a retirement.

d. Other capabilities include support to broad COAs or specific types of operations. Examples of these types of capabilities are--

(1) Use of NBC weapons.

(2) Use of supporting air assets.

(3) Intelligence collection.

(4) EW.

(5) Engineering operations.

(6) Air assault or airborne operations.

(7) Amphibious assaults.

(8) River operations.

(9) Psychological operations (PSYOP).

(10) Deception operations.

Note: Most situations will not present the enemy with the ideal conditions envisioned by his doctrine and TTP. He will usually be under-strength in terms of personnel or equipment. He may be short of logistical support. He may not enjoy air superiority. His troops may be inexperienced or poorly trained. As a result, the enemy's actual capabilities usually will not mirror the ideal capabilities represented by the complete set of enemy models.

C-4. Identify potential enemy COAs using the following steps.

a. Identify the enemy's likely objectives and desired end state.

(1) Start with the enemy command at least one level above your own and identify likely objectives and the desired end state. As you identify the likely enemy objectives at each level of command, repeat the process for the next subordinate level, working down to two levels below

your own command. Ensure that each level's objective will accomplish the likely objectives and desired end state of its parent commands.

(2) Additional considerations.

(a) The situation may require you to start at more than one level above your command, particularly in operations other than war.

(b) Only in rare cases will you have the intelligence you need to state the enemy's objectives and intended end state as facts. You will usually state them as assumptions. As with all assumptions, ensure that you discuss them with the battalion staff. Ensure that you identify assumptions as such.

(c) It is important that you consider more than the conventional objectives of terrain or friendly forces, especially during operations other than war. This is also true at higher levels of command where the enemy's political and economic objectives have a direct influence on his COAs.

(d) Terrain-related objectives (intermediate and final) often focus on key terrain features. Force-related objectives usually focus on reserve forces.

(e) Even during defensive operations the enemy will have objectives, such as retain control of a piece of terrain, defeat or delay a friendly force, or take prisoners. You must also identify likely enemy counterattack objectives such as terrain features or friendly reserve forces.

(f) It is possible that the enemy's intent and objectives may not interfere with the accomplishment of the friendly mission. This is more likely during operations other than war.

b. Identify the full set of COAs available to the enemy.

(1) To ensure that you consider the full set of COAs available to the enemy, you must at least consider--

(a) The COAs the enemy's doctrine believes appropriate to the current situation and the likely objectives you have identified. This requires an understanding of the enemy's decision-making process as well as an appreciation for how he perceives the current situation.

(b) The enemy COAs that could significantly influence your command's mission, even if the enemy's doctrine considers them infeasible or "sub-optimum" under current conditions. Consider any indirect or "wild card" COAs that the enemy is capable of executing.

(c) The enemy COAs indicated by recent activities and events. To avoid surprise from an unanticipated COA, consider all possible explanations for the enemy's activity in terms of possible COAs.

(d) Refine each broad enemy COA statement into a set of specific enemy COAs. For example, a general COA such as "hasty attack" might be further defined as a set of specific COAs such as "with main effort in the east . . . in the west . . . against the adjacent unit."

(e) Each enemy COA you identify should meet five criteria: suitability, feasibility, acceptability, uniqueness, and consistency with doctrine.

c. Evaluate and prioritize each COA.

(1) The resulting set of COAs depicts the full set of options available to the enemy. Remember that the enemy COAs you identify are *assumptions* about the enemy, *not facts*. Because of this, you cannot predict with complete accuracy which of the COAs the enemy will employ. However, the enemy commander and his staff still need to develop a plan that is optimized to one of the

COAs, while still allowing for contingency options if he chooses another COA. Therefore, you must evaluate each COA and prioritize it according to how likely you estimate it is that the enemy will adopt that option. Establish an initial priority list to allow the staff to plan for friendly COAs. Once the commander selects a friendly COA, you may need to reorder the list of enemy COAs. Consider especially any changes in the enemy's perception of friendly forces.

(2) To prioritize each enemy COA--

- (a) Analyze each COA to identify its strengths and weaknesses, centers of gravity, and decisive points.
- (b) Evaluate how well each COA meets the criteria of suitability, feasibility, acceptability, and consistency with enemy doctrine.
- (c) Evaluate how well each COA takes advantage of the battlefield environment. How does the battlefield encourage or discourage selection of each COA?
- (d) Compare each COA to the others and determine if the enemy is more likely to prefer one to the others. Most forces will choose the COA that offers the greatest advantages while minimizing risk.
- (e) Consider the possibility that the enemy may choose the second or third "best" COA while attempting a deception operation portraying acceptance of the "best" COA.
- (f) Analyze the enemy's recent activity to determine if there are indications that one COA is already being adopted. Does his current disposition favor one COA over others?

(3) Use judgment to rank the enemy's COAs in their likely order of adoption. Modify the list as needed to account for changes in the current situation. For example, the initial priority order of enemy COAs does not account for the friendly COA, since one has not yet been selected. Friendly dispositions may change as the command moves to adopt its own COA. How will that change the likelihood of each enemy COA? Given time, you could develop several different versions of the prioritized list of enemy COAs--a different order for each potential friendly COA. Alternatively, after the commander has selected the friendly COA, reprioritize the initial list of enemy COAs to reflect changed friendly dispositions and activities.

d. Develop each enemy COA in the amount of detail that time will allow.

(1) Once you have identified the complete set of enemy COAs, develop each COA into as much detail as the situation requires and time available allows. Base the order in which you develop each COA on its probability of adoption and the commander's guidance. To ensure completeness, each COA must answer five questions:

- (a) WHAT - the type of operation, such as attack, defend, reinforce, or conduct retrograde.
- (b) WHEN - the time the action will begin. You usually state this in terms of the earliest time that the enemy can adopt the COA under consideration.
- (c) WHERE - the sectors, zones, axis of attack, avenues of approach, and objectives that make up the COA.
- (d) HOW - the method by which the enemy will employ his assets, such as dispositions, location of main effort, the scheme of maneuver, and how it will be supported.
- (e) WHY - the objective or end state the enemy intends to accomplish.

(2) Consider enemy forces available to at least one level of command above your own when developing each COA. For example, a battalion S2 would consider the COAs available to enemy

regiments and brigades. This helps to ensure that you account for possible reinforcing forces and the higher command's own objectives and intent.

(3) Time permitting, the final product should consist of a comprehensive, detailed set of enemy COAs. Work to a degree of resolution at two levels of command below your own. For example, a brigade S2 would depict the missions and actions of enemy battalions and companies in the enemy COAs he develops.

(4) Each developed enemy COA has three parts:

- (a) A situation template.
- (b) A description of the COA and options.
- (c) A listing of HVTs.

e. Identify initial collection requirements.

(1) After identifying the set of potential enemy COAs the initial challenge is to determine which one he will actually adopt. Initial collection requirements are designed to help you answer the challenge.

(2) The art of identifying initial collection requirements revolves around predicting specific areas and activities which, when observed, will reveal which COA the enemy has chosen. The areas where you expect key events to occur are called NAIs. The activities that reveal the selected COA are called indicators.
